American Indian English documents and examines the diversity of English in American Indian speech communities. It presents a convincing case for the fundamental influence of ancestral American Indian languages and cultures on spoken and written expression in different Indian English codes. A distillation of over twenty years' research, this pioneering work explores the linguistic and sociolinguistic characteristics of English language use among members of Navajo, Hopi, Mojave, Ute, Tsimshian, Kotzebue, Ponca, Pima, Lakota, Cheyenne, Laguna, Santa Ana, Isleta, Chilcotin, Seminole, Cherokee, and other American Indian tribes. American Indian English fills numerous gaps in existing studies of language histories, Indian student school experience, Indian-white contact, and "acculturation." Unlike contemporary studies on schooling, ethnicity, empowerment, and educational failure, American Indian English avoids postmodernist jargon and discourse strategies in favor of direct description and commentary. Data are derived from conditions of real-life experience faced by speakers of Indian English in various English-speaking settings. This practical focus enhances the book's accessibility to Indian educators and community-based teachers, as well as non-Indian academics.

Second Language Writers' Text

A Guide to Early Jewish Texts and Traditions in Christian Transmission

Information Structure and Syntactic Change in the History of English

Official organ of the book trade of the United Kingdom.

This comprehensive and detailed analysis of second language writers' text identifies explicitly and quantifiably where their text differs from that of native speakers of English. The book is based on the results of a large-scale study of university-level native-speaker and non-native-speaker essays written in response to six prompts. Specifically, the research investigates the frequencies of uses of 68 linguistic (syntactic and lexical) and rhetorical features in essays written by advanced non-native speakers compared with those in the essays of native speakers enrolled in first-year composition courses. The selection of features for inclusion in this analysis is based on their textual functions and meanings, as identified in earlier research on English language grammar and lexis. Such analysis is valuable because it can inform the teaching of grammar and lexis, as well as discourse, and serve as a basis for second language curriculum and course design; and provide valuable insight for second language pedagogical applications of the study's findings.

The Jewish culture of the Hellenistic and early Roman periods established a basis for all monotheistic religions, but its main sources have been preserved to a great degree through Christian transmission. This Guide is devoted to problems of preservation, reception, and transformation of Jewish texts and traditions of the Second Temple period in the many Christian milieus from the ancient world to the late medieval era. It approaches this corpus not as an artificial collection of reconstructed texts--a body of hypothetical originals--but rather from the perspective of the preserved materials, examined in their religious, social, and political contexts. It also considers the other, non-Christian, channels of the survival of early Jewish materials, including Rabbinic, Gnostic, Manichaeen, and Islamic. This unique project brings together scholars from many different fields in order to map the trajectories of early Jewish texts and traditions among diverse later cultures. It also provides a comprehensive and comparative introduction to this new field of study while bridging the gap between scholars of early Judaism and of medieval Christianity.

Designed specifically for students studying English language and/or literature at universities and colleges, this textbook combines critical dictionary, anthology and study guide. It is inter-disciplinary in approach and flexible in its range of applications.

The essays in Word and Self Estranged in English Texts, 1550-1660, consider diverse historical contexts for writing about 'strangeness'. They draw on current practices of reading to present contrasts and analogies within and between various social understandings. In so doing they reveal an interplay of thematic and stylistic modes that tells us a great deal about how, and why, certain aspects of life and thinking were 'estranged' in sixteenth and seventeenth century thinking. The collection's unique strength is that it makes specific bridges between contemporary perspectives and early modern connotations of strangeness and inhibition. The subjects of these essays are 'strange' to our ways of thinking because of their obvious distance from us in time and culture. And yet, curiously, far from being entirely alien to these texts, some of the most modern thinking-about paradigms, texts, concepts-connects with the early modern in unexpected ways. Milton meets the contemporary 'competent reader', Wittgenstein meets Robert Cawdrey, Shakespeare embraces the teenager, and Marvell matches wits with French mathematician René Thom. Additionally, the early modern texts posit their own 'others', or sites of estrangement-Moorishness, Persian art, even the human body-with which they perform their own astonishing maneuvers of estrangement and alignment. In reading Renaissance works from our own time and inviting them to reflect upon our own time, Word and Self Estranged in English Texts, 1550-1660 offers a vital reinterpretation of early modern texts.

This dynamic text, cases, & materials book provides a thought-provoking guide to the public law of the UK. It sets out key institutions, legal principles, and conventions and its clear commentary draws on case studies and extracts from a range of sources to provide a full understanding of the law and the major theoretical and political debates.
