The Get-Over-Yourself Self-Help Book and Other Essays presents a collection of vignettes, narratives, and rants that detail the often absurd business of getting on with life. In an attempt to aspire to a so-called higher life, many of us fear both death and youth, reaching for perfection through the latest technical gadgets that encourage us to cling to preconceived notions of ourselves and to define ourselves through a text message. But is that really any way to truly live? Baby boomer columnist and curmudgeon Sylvia Shawcross believes that satirists have a purpose in this world—to help others to laugh at the absurdity of life. In her second compilation of humorous reflections, Shawcross begins with a hilarious recounting of the frustrating chain of events that occur when she attempts to replace a broken remote at the electronics store and continues with a series of lighthearted essays where she reveals the unconventional and often wacky behavior of those she encounters daily. From the reasons behind rampant consumerism to the forced reprogramming behind ten-digit dialing, Shawcross contemplates issues of global importance while encouraging all of us

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law – the law affecting information and communication technology (ICT) – in Mexico covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime.

Today there are more than five million women and their children are living in a violent relationship, and this number is increasing as new technology from tracking devices on cell phones to computer technology allow an abuser to track its' victims every move. Domestic violence and stalking related crimes are being dismissed in a flurry of shuffled divorced documents and court orders of protection. You cannot plead with an abuser and walk away from potentially life threatening situations if you are unable to learn the steps necessary to protect yourself. In this straight forward, clearly written guidebook, veteran violence safety expert Susan Murphy Milano provides victims the tools and support they require to face this debilitating problem and take the necessary steps to regain control of their lives. Victims and those going through divorce now are able to provide information, in their own words, about the fears, dangers, experiences they have had at the hands of their abuser. Like our own individual fingerprints, no two crimes against a victim are the same. An abuser is clever like a fox and this book will teach you the techniques to be ten steps ahead before a threat against your life can be carried out against you or your children. With the Evidentiary Abuse affidavit provided in this book a victim will be able to provide legal documentation and answers,

Full text online version at www.nyupress.org/netwars. Who will rule cyberspace? And why should people care? Recently stories have appeared in a variety of news media, from the sensational to the staid, that portray the Internet as full of pornography, pedophilia, recipes for making bombs, lewd and lawless behavior, and copyright violators. And, for politicians eager for votes, or to people who have never strolled the electronic byways, regulating the Net seems as logical and sensible as making your kids wear seat belts. Forget freedom of speech: children can read this stuff. From the point of view of those on the Net, mass-media's representation of pornography on the Internet grossly overestimates the amount that is actually available, and these stories are based on studies that are at best flawed and at worst fraudulent. To netizens, the panic over the electronic availability of bomb-making recipes and other potentially dangerous material is

groundless: the same material is readily available in public libraries. Out on the Net, it seems outrageous that people who have never really experienced it are in a position to regulate it. How then, should the lines be drawn in the grey area between cyberspace and the physical world? In net.wars, Wendy Grossman, a journalist who has covered the Net since 1992 for major publications such as Wired, The Guardian, and The Telegraph, assesses the battles that will define the future of this new venue. From the Church of Scientology's raids on Net users to netizens attempts to overthrow both the Communications Decency Act and the restrictions on the export of strong encryption, net.wars explains the issues and the background behind the headlines. Among the issues covered are net scams, class divisions on the net, privacy issues, the Communications Decency Act, women online, pornography, hackers and the computer underground, net criminals and sociopaths, and more.

recording industry's content, attitudes and practices have regularly been under the microscope. Much of this discussion, however, is dominated by US and UK perspectives and assumes the 'the recording industry' to be a relatively static, homogeneous, entity. This book attempts to offer a broader, less Anglocentric and more dynamic understanding of the recording industry. Its starting premise is the idea that the recording industry is not one thing but is, rather, a series of recording industries, locally organised and locally focused, both structuring and being structured by the international industry. Seven detailed case studies of different national recording industries illustrate this fact, each of them specifically chosen to provide a distinctive insight into the workings of the recording industry. The expert contributions to this book provide the reader with a sense of the history, structure and contemporary dynamics of the recording industry in these specific territories, and counteract the Anglo-American bias of coverage of the music industry.
