

# Chapter Review

## Interpreting Graphics

Miles, Huberman, and Saldaña's *Qualitative Data Analysis: A Methods Sourcebook* is the authoritative text for analyzing and displaying qualitative research data. The Fourth Edition maintains the analytic rigor of previous editions while showcasing a variety of new visual display models for qualitative inquiry. Graphics are added to the now-classic matrix and network illustrations of the original co-authors. Five chapters have been substantially revised, and the appendix's annotated bibliography includes new titles in research methods. Graduate students and established scholars from all disciplines will find this

resource an innovative compendium of ideas for the representation and presentation of qualitative data. As the authors demonstrate, when researchers “think display,” their analyses of social life capture the complex and vivid processes of the people and institutions studied.

The perfect math instruction course for anyone preparing for the GRE exam  
Includes sample problems throughout  
Features an extensive math review targeted specifically for the math sections of the GRE  
Includes two full GRE math sections with answers and explanations  
Provides up-to-date, research-based theory and practical applications designed to help teachers learn to meet the demanding needs of today's diverse students.

**are continually reinforced throughout. When introducing mathematical ideas, the text moves from the concrete to the abstract, rather than the reverse. It is the authors' philosophy that learning is increased when students can relate a concept to something in their lives. Hence, mathematical concepts are often introduced through applications that help make the mathematics "real" to students. Students see the importance of a topic from a practical and intuitive point of view, with models and applications playing a central part in the learning process.**
