

Manuel Ma As Rodr Guez Gram Tica Inglesa

Roving vigilantes, fear-mongering politicians, hysterical pundits, and the looming shadow of a seven hundred-mile-long fence: the US – Mexican border is one of the most complex and dynamic areas on the planet today. Hyperborder provides the most nuanced portrait yet of this dynamic region. Author Fernando Romero presents a multidisciplinary perspective informed by interviews with numerous academics, researchers, and organizations. Provocatively designed in the style of other kinetic large-scale studies like Rem Koolhaas’s Content and Bruce Mau’s Massive Change, Hyperborder is an exhaustively researched report from the front lines of the border debate.

Relational Communication: An Interactional Perspective to the Study of Process and Form brings together in one volume a full treatment of the relational communication perspective on the study of relationships. This perspective takes to heart the formative nature of communication by focusing on the codefined patterns of interaction by which members jointly create their relationship. This book provides a strong theoretical foundation to the research approach and also offers a step-by-step guide for carrying out the research procedures. It is a complete guide for the beginner or experienced researcher. The contributed chapters are written by researchers from psychology, clinical psychology, marital and family therapy, as well as marital, health, and organizational communication. Several of the studies on marital interaction are based on both American and Spanish research samples, offering a cross-disciplinary and cross-cultural application of the perspective. Part I opens with a discussion of the theoretical foundation and epistemological grounding of the perspective and then moves on to the observational research methods involved in applying the perspective’s interactional approach. Part II presents a set of programmatic research exemplars that describe the application of the relational communication approach in different relational contexts, from marital to organizational settings. Part III offers a reflective overview of the research perspective. This book is appropriate for advanced undergraduate and graduate students, scholars, and researchers in communication. It will also be of interest to professionals, students, teachers and researchers in the fields of marital relations and family study, social and clinical psychology, family therapy, social work, and marital and family counseling programs.

This book presents a collection of real cases from industrial practices that production system and quality managers implement to ensure a high quality as well as a low cost in products. This book is divided in sections that are focused on:
· The quality and philosophies implemented to production systems: starting from the product design as well as from the supply system.
· The principal statistical techniques applied to the quality assurance (statistical quality control, analysis of tests and failure, quality function deployment, accelerated life tests, among others), the process of gathering information, its validation, its reliability process, and techniques for data analysis.
· The techniques applied to the integration of human resources in the process of quality assurance, such as managers and operators ’ participation, training, and training processes.
· Use of information and communications technologies, software, and programs implemented to guarantee the quality of the products in the production systems. ISO standards and policies that are used for quality management and monitoring.

The 1624 Tumult of Mexico in Perspective proves that, despite the various conflicts underlying the disturbances in New Spain between circa 1620 and 1650, there was no intention to do away with the authority of the king.

French and Flemish Merchant Networks in Seville (1570 – 1650)

Third series

Encyclopedia of Twentieth-Century Latin American and Caribbean Literature, 1900 – 2003

Reports

In early modern times, Seville was the most important hub for the transatlantic economy. It attracted a large number of foreign merchants who connected the American with the European markets. While the transatlantic axis of this trade has drawn much attention in historiography, the connection between Seville and the European Atlantic coast has largely been ignored. Therefore, this book analyzes the central actors of this trade route who were the Flemish and French merchants of Seville. Following their commercial activities, it shows features of their private and business networks in Seville and displays fundamental structures and processes of the European and transatlantic economy.

During the last decades, soil organic carbon (SOC) attracted the attention of a much wider array of specialists beyond agriculture and soil science, as it was proven to be one of the most crucial components of the earth’s climate system, which has a great potential to be managed by humans. Soils as a carbon pool are one of the key factors in several Sustainable Development Goals, in particular Goal 15, ☐Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification and halt and reverse land degradation and halt biodiversity loss! with the SOC stock being explicitly cited in Indicator 15.3.1. This technical manual is the first attempt to gather, in a standardized format, the existing data on the impacts of the main soil management practices on SOC content in a wide array of environments, including the advantages, drawbacks and constraints. This manual presents different sustainable soil management (SSM) practices at different scales and in different contexts, supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications. Volume 4 includes 51 case studies dealing with cropland, grassland, integrated systems and farming approaches.

Independence for Puerto Rico: Hearings, Apr. 23-May 8, 1945

Following the tradition and style of the acclaimed Index Islamicus, the editors have created this new Bibliography of Art and Architecture in the Islamic World. The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages (except Turkish) between 1906 and 2011. This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies.

Laura Lojo is Associate Professor of English literature and language at the University of Santiago de Compostela and has a Ph.D. in Virginia Woolf’s writing. Lojo is the author of Introduction to Virginia Woolf’s Short Fiction (2003), and is co-editor of Writing Bonds: Irish and Galician Contemporary Women Poets (2009). She has also published book chapters and articles in literary journals on various topics, such as the reception of British modernism in Spanish-speaking countries, Irish women’s poetry, women’s studies, and comparative literature. --

The Spanish Connection

As Louisiana and Cuba emerged from slavery in the late nineteenth century, each faced the question of what rights former slaves could claim. "Degrees of Freedom" compares and contrasts these two societies in which slavery was destroyed by war, and citizenship was redefined through social and political upheaval. Both Louisiana and Cuba were rich in sugar plantations that depended on an enslaved labor force. After abolition, on both sides of the Gulf of Mexico, ordinary people—cane cutters and cigar workers, laundresses and labor organizers—forged alliances to protect and expand the freedoms they had won. But by the beginning of the twentieth century, Louisiana and Cuba diverged sharply in the meanings attributed to race and color in public life, and in the boundaries placed on citizenship. Louisiana had taken the path of disenfranchisement and state-mandated racial segregation; Cuba had enacted universal manhood suffrage and had seen the emergence of a transracial conception of the nation. What might explain these differences? Moving through the cane fields, small farms, and cities of Louisiana and Cuba, Rebecca Scott skillfully observes the people, places, legislation, and leadership that shaped how these societies adjusted to the abolition of slavery. The two distinctive worlds also came together, as Cuban exiles take refuge in New Orleans in the 1880s, and black soldiers from Louisiana garrison small towns in eastern Cuba during the 1899 U.S. military occupation. Crafting her narrative from the words and deeds of the actors themselves, Scott brings to life the historical drama of race and citizenship in postemancipation societies.

"A Comparative History of Literatures in the Iberian Peninsula" is the second comparative history of a new subseries with a regional focus, published by the Coordinating Committee of the International Comparative Literature Association. As its predecessor for East-Central Europe, this two-volume history distances itself from traditional histories built around periods and movements, and explores, from a comparative viewpoint, a space considered to be a powerful symbol of inter-literary relations. Both the geographical pertinence and its symbolic condition are obviously discussed, when not even contested.Written by an international team of researchers who are specialists in the field, this history is the first attempt at applying a comparative approach to the plurilingual and multicultural literatures in the Iberian Peninsula. The aim of comprehensiveness is abandoned in favor of a diverse and extensive array of key issues for a comparative agenda."A Comparative History of Literatures in the Iberian Peninsula" undermines the primacy claimed for national and linguistic boundaries, and provides a geo-cultural account of literary inter-systems which cannot otherwise be explained.

This book presents some definitions and concepts applied in Latin America on lean manufacturing (LM), the LM tools most widely used and human and cultural aspects that most matter in this field. The book contains a total of 14 tools used and reported by authors from different countries in Latin America, with definition, timeline with related research, benefits that have been reported in literature and case studies implemented in Latin American companies. Finally, the book presents a list of softwares available to fa

improvement.

This book explores how Seventh-day Adventists, like other Christians, can benefit from generating their own version of communio ecclesiology. It starts by offering a critical analysis of the status quo of the existing Adventist portrayal of church as remnant, and suggests potential ways of moving this tradition forward. To articulate a more rounded and comprehensive vision of the church’s rich and multifaceted relational nature, this book draws on the mainstream Christian kolonia-based framework. Consequently, it

divisive ecclesial issues that Christian communities face today regarding church structure, ministry, mission, communal interpretation, and reform. As it sets on a new footing the conversation between Adventism and other mainstream Christian traditions, the methodology of this book serves as a pathway for any Christian community to use when revisiting and enhancing its own current theologies of the church.
