Cambridge IGCSE First Language Coursebook

Begin jaren zeventig reisde de jonge Engelsman Tom Michell naar Argentinië, waar hij een buan heeft gevonden als leraar op een prestigieuze kostschool. Hij verheugt zich op de eindeloze zomervakanties: met een motorfiets wil hij Zuid-Amerika ontdekken. Maar alles verandert wanneer hij op het strand van Uruguay een met olie besmeurde pinguïn vindt. Tom besluit de pinguïn te redden en neemt hem mee naar zijn smetteloze appartement, waar hij het arme beest weer opkapt. Als hij de pinguïn terugbrengt naar het strand wil het dier hem niet meer verlaten. Er zit niks anders op: Tom neemt de aandoenlijke pinguïn, die hij Juan Salvador noemt, mee naar de kostschool, waar de vrolijke vogel ieders hart verovert. De pinguïnessen is het waargeburde en hartverwarmende verhaal over een uitzonderlijke vriendschap tussen een mens en een dier.

Tweetalige editie van het beroemde toneelstuk Twee zomers, Vladimir en Estragon, wachten ergens op een landweg naast een boom op iemand, of iets, met de naam Godot. Zo begint het belangrijkste en invloedrijkste toneelstuk van de afgelopen zeventig jaar. Het eind van de jaren veertig van de twintigste eeuw was in het leven van de Iers-Franse schrijver Samuel Beckett een bijzonder vruchtbare periode: niet alleen voltooidde hij drie romans die als het hoogtepunt van zijn prozawerk worden beschouwd, hij schreef ook het toneelstuk dat tot op de dag van vandaag wordt opgevoerd: Wachten op Godot.

Cambridge IGCSE(TM) First Language English Exam Preparation and Practice

This collection presents new investigations into the role of heritage languages and the correlation between culture and language from a pedagogic and cosmopolitical point of view. Produced with University of Cambridge International Examinations, the Toolkit helps teachers to develop language awareness to support their students with the academic language they need to be successful in subjects taught through English. With reflective questions and activities, it can be used either for self-study or in training modules. Useful for both content and English language teachers, it is aimed primarily at those who teach students for whom English is not their first language - for example as part of a bilingual or CLIL programme or in an international English-medium school.

This series has been developed specifically for the Cambridge International AS & A Level Mathematics (9709) syllabus to be examined from 2020. Cambridge International AS & A Level Mathematics: Mechanics matches the corresponding unit of the syllabus, with clear and logical progression through. It contains materials on topics such as velocity and acceleration, force and motion, friction, connected particles, motion in a straight line, momentum, and work and energy. This coursebook contains a variety of features including recap sections for students to check their prior knowledge, detailed explanations and worked examples, end-of-chapter and cross-topic review exercises and 'Explore' tasks to encourage deeper thinking around mathematical concepts. Answers to coursebook questions are at the back of the book.
