Pharmacy Education in the Twenty First Century and Beyond: Global Achievements and Challenges offers a complete reference on global pharmacy education, along with a detailed discussion of future issues and solutions. This book begins with a brief overview of the history of pharmacy education, covering all levels of education and styles of learning, from undergraduate, continuing professional education, and methods for self-learning and development. Teaching strategies such as team-based learning, problem-based learning and interdisciplinary education are also described and compared to conclude why certain pharmacy programs attract students, and why educators prefer particular teaching strategies, assessment tools and learning styles. As a result, this book provides pharmacy educators, administrators, students and practitioners with a comprehensive guide to pharmacy education that will enable readers to choose the best approaches to improve, reform or select a program based on worldwide experience and the latest available evidence and research. Describes and discusses the advantages and disadvantages associated with different types of pharmacy curricula, degree programs, styles of learning, teaching strategies, and more Edited and written by a team of authors to provide diverse global experiences and insights into what factors make a program attractive and successful Covers important topics in pharmacy education, such as quality and accreditation issues, the business of pharmacy education, leadership and similarities

This workbook guides students through basic skills, mathematical review, and successful problem-solving techniques. Practice tests and solutions to odd-numbered text problems are included.

This book is specially written for students sitting for the Singapore Cambridge O Level Chemistry examination. A comprehensive coverage of all the topics in the latest 2007 syllabus, as well as mid-year and final-year examination papers, enable students to study effectively and achieve success in their examinations.

Innovative Methods of Teaching and Learning Chemistry in Higher Education

The trusted, innovative, calibrated leader Unrivaled problems, notable scientific accuracy and currency, and remarkable clarity have made Chemistry: The Central Science the leading general chemistry text for more than a decade. Trusted, innovative, and calibrated, the text increases conceptual understanding and student success in general chemistry by building on the expertise of the dynamic author team of leading researchers and award-winning professors. The new Thirteenth Edition builds on the Twelfth Edition's major revision, in which every word and piece of art was scrutinized by all the authors to increase its effectiveness. Placing a greater emphasis on research, this edition is more tightly integrated with MasteringChemistry, the leading online homework, tutorial, and assessment program- resulting in an unparalleled teaching and learning package that personalizes learning and coaches students toward understanding and mastery of tough chemistry topics. This program presents a better teaching and learning experience-for you and your students.It provides: *Enhanced learning from a dynamic author team of leading researchers and award-winning professors; Each member of this well-respected author team brings their expertise in a wide range of areas to the pages of this popular text. All authors have been active researchers and have taught general chemistry for many years. *Improved conceptual understanding through stepped up, relevant pedagogy: Students get numerous opportunities to test their knowledge through Give It Some Thought (GIST) exercises, Go Figure questions, and A Closer Look essays, now integrated with clicker questions and in MasteringChemistry. *Invaluable aids that ensure problem-solving success: By using a consistent process, a unique Analyze/Plan/Solve/Check format, dual-column problem-solving approach in certain areas, a new practice exercise following each worked example, and the Strategies in Chemistry feature, students are placed on the right path from the very start to excel at problem solving and comprehension.*Clarity through visualization from a variety of perspectives, including macroscopic, microscopic, and symbolic: Included are Visualizing Concepts exercises, with models, graphs, and other visual materials; sample exercises with molecular illustrations; and conceptual questions in the end-of-chapter questions. *Superior support beyond the classroom with MasteringChemistry: Students benefit from personalized, interactive learning through MasteringChemistry's self-paced tutorials that guide them through the text's most challenging topics; provide immediate, specific feedback; and keep students engaged and on track. Note: You are purchasing a standalone product; MasteringChemistry does not come packaged with this content. MasteringChemistry is not a self-paced technology and should only be purchased when required by an instructor.

In preparing The Pearson Complete Guide for the AIEEE, the authors have drawn extensively from their years of experience in preparing students for the All India Engineering Entrance Examination. Covering all three subjects mathematics, physics, and chemistry this book deals lucidly with every topic mentioned in the revised AIEEE syllabus. The book will also serve the needs of other major engineering entrance examinations. FEATURES * Based on the latest AIEEE syllabus * Explanations of concepts and their applications given at the beginning of each chapter * More than 5,000 solved problems * More than 10,000 practice questions including previous years' questions * Features such as Short Cuts, Key Points to Remember, and Caution enhance and sharpen problem-solving skills

Bring content to life with the interactive whiteboard ready products for Prentice Hall Chemistry. Prentice Hall Chemistry meets the needs of students with a range of abilites, diversities, and learning styles by providing real-world connections to chemical concepts and processes. The first nine chapters introduce students to the conceptual nature of chemistry before they encounter the more rigorous mathematical models and concepts in later chapters. The technology backbone of the program is the widely praised Interactive Textbook with ChemASAP!, which provides frequent opportunities to practice and reinforce key concepts with tutorials that bring chemistry to students through: Animations, Simulations, Assessment, and Problem-solving tutorials.

This volume emphasizes the role of chemical education for development and, in particular, for sustainable development in Africa, by sharing experiences among specialists across the African continent and with specialists from other continents. It considers all areas and levels of chemistry education, gives specific attention to known major challenges and encourages explorations of novel approaches. The chapters in this book describe new teaching approaches, approach-explorations and in-class activities, analyse educational challenges and possible ways of addressing them and explore cross-discipline possibilities and their potential benefits for chemistry education. This makes the volume an up to date compendium for chemistry educators and educational researchers worldwide.

Two recent initiatives from the EU, namely the Bologna Process and the Lisbon Agenda are likely to have a major influence on European Higher Education. It seems unlikely that traditional teaching approaches, which supported the elitist system of the past, will promote the mobility, widened participation and culture of 'life-long learning' that will provide the foundations for a future knowledge-based economy. There is therefore a clear need to seek new approaches to support the changes which will inevitably occur. The European Chemistry Thematic Network (ECTN) is a network of some 160 university chemistry departments from throughout the EU as well as a number of National Chemical Societies (including the RSC) which provides a discussion forum for all aspects of higher education in chemistry. This handbook is a result of one of their working groups, who identified and collated good practice with respect to innovative methods in Higher Level Chemistry Education. It provides a comprehensive overview of innovations in university chemistry teaching from a broad European perspective. The generation of this book through a European Network, with major national chemical societies and a large number of chemistry departments as members make the book unique. The wide variety of scholars who have contributed to the book, make it interesting and invaluable reading for both new and experienced chemistry lecturers throughout the EU and beyond. The book is aimed at chemistry education at universities and other higher level institutions and at all academic staff and anyone interested in the teaching of chemistry at the tertiary level. Although newly appointed teaching staff are a clear target for the book, the innovative aspects of the topics covered are likely to prove interesting to all committed chemistry lecturers.

If you think you know the Brown, LeMay Bursten Chemistry text, think again. In response to market request, we have created the third Australian edition of the US bestseller, Chemistry: The Central Science. An extensive revision has taken this text to new heights! Triple checked for scientific accuracy and consistency, this edition is a more seamless and cohesive product, yet retains the clarity, innovative pedagogy, functional problem-solving and visuals of the previous version. All artwork and images are now consistent in quality across the entire text. And with a more traditional and logical organisation of the Organic Chemistry content, this comprehensive text is the source of all the information and practice problems students are likely to need for conceptual understanding, development of problem solving skills, reference and test preparation.

Learning and teaching is an integrated process, and theory and practice cannot be separated. As in the previous Australasian edition, Educational Psychology 3e continues to emphasise the educational implications and applications of child development, cognitive science, learning and teaching. Recurring themes throughout the text include ideas about education; social and socio-cultural aspects of education; schools, families and community; development, learning and curriculum; and effective teaching. Author Kay Margetts incorporates Australasian perspectives and applications using the work of Australasian researchers and teachers. Numerous examples, case studies, guidelines and practical tips from experienced teachers are used in the text to explore the connections between knowledge, understanding and practice.

To clear the All India Engineering Entrance Examination (AIEEE), students need to have a solid conceptual framework as well as adequate experience in solving original, exam-like questions. The Pearson Guide to Objective Chemistry for the AIEEE seeks to serve this purpose by striking a unique balance between theory and practice. Features such as Facts to Remember, Important Guidelines, Tools and Summary furnish the theoretical basis whereas practice questions arranged in levels sharpen the studentâ€™s problem-solving skills. Designed and chiseled specifically for the AIEEE, this book is the most focused manual for aspirants available.

Now including MasteringChemistry®, the leading online homework, tutorial, and assessment product with a demonstrated record of helping students quickly master concepts, this Fifth Edition includes new opportunities for you to practice key concepts. MasteringChemistry provides seamless synergy with the text to create a dynamic learning program that enables you to learn both in and out of the classroom. With Russo and Silver's Introductory Chemistry , Fifth Edition and MasteringChemistry, you get a complete teaching and learning program that gives you critical tools for ensuring a successful introduction to chemistry, including: An atoms-first approach to chemistry: Through an atoms-first approach used effectively in the previous four editions, you begin to learn starting from the building blocks of matter and progress to understanding complex concepts from a logical point of view and with a deep understanding. Personalized, interactive learning for achieving proficiency of the concepts with MasteringChemistry: Self-paced tutorials guide you through the text's most challenging topics; provide immediate, specific feedback and reinforcement; and present varied content to keep you engaged and on track. An emphasis on core concepts for solving quantitative and qualitative problems: Get a true understanding of introductory chemistry by using material that presents problem solving and comprehension as complimentary skills, rather than encouraging rote memorization. Features that demonstrate how relevant chemistry concepts are in students' lives: A number of outstanding features that show chemistry as a fascinating science.

Part of the Prentice Hall Series in Educational Innovation for Chemistry, this unique book is a collection of information, examples, and references on learning theory, teaching methods, and pedagogical issues related to teaching chemistry to college students. In the last several years there has been considerable activity and research in chemical education, and the materials in this book integrate the latest developments in chemistry. Each chapter is written by a chemist who has some expertise in the specific technique discussed, has done some research on the technique, and has applied the technique in a chemistry course.

This second edition of 'Basic Chemistry' is a text for the preparatory chemistry course that gives students the problem-solving tools and techniques needed to be successful in future chemistry courses and in the work force.
