

Question Of B Unit Dhaka University

At the beginning of the twenty-first century an idealized view of markets informs government policy. Real differences in how markets interact with social change are obscured and public action on poverty is constrained. Markets, Class and Social Change uses a detailed study of the grain trade in Bangladesh to show how socially-constrained patterns of market involvement may systematically benefit the rich while disadvantaging the poor. More generally, the book suggests that markets are implicated in the making of society, its divisions, identities and directions.

This book is a collection of papers reflecting the latest advances in geographic research on health, disease, and well-being. It spans a wide range of topics, theoretical perspectives, and methodologies - including anti-racism, post-colonialism, spatial statistics, spatiotemporal modeling, political ecology, and social network analysis. Health issues in various regions of the world are addressed by interdisciplinary authors, who include scholars from epidemiology, medicine, public health, demography, and community studies. The book covers the major themes in this field such as health inequalities; environmental health; spatial analysis and modeling of disease; health care provision, access, and utilization; health and wellbeing; and global/transnational health and health issues in the global south. There is also a specially commissioned book review in addition to the chapters included in these six sections. Together, these chapters show cogently how geographic perspectives and methods can contribute in significant ways to advancing our understanding of the complex interactions between social and physical environments and health behaviors and outcomes. This book was published as a special issue of Annals of the Association of American Geographers.

This book constitutes the proceedings of the 4th International Workshop on Algorithms and Computation, held in Dhaka, Bangladesh, in February 2010. The 23 revised full papers were carefully reviewed and selected from 60 submissions. The volume also contains 4 invited papers.The topics covered are graph drawing, computational geometry, graph algorithms, computational biology and strings, combinatorial optimization, approximation algorithms, and parameterized complexity.

This book critically discusses the multi-dimensional contemporary issues within the ambit of the driving forces, mechanisms, vulnerability, and opportunities of the intra-region human movement in South Asia. It covers different dimensions of cross-border migration within South Asia as well as internal migration particularly in India, reflecting upon both voluntary and forced movements. It traces the trajectory and past trends in migration in the South Asian countries. It evaluates the vulnerability of refugees and stateless vis-à-vis state policies. Issues regarding Rohingya refugees from Myanmar to Bangladesh, Nepalese immigration to India, the crisis around Sri Lankan Tamil refugees, Afghan returnee refugees from Pakistan and Iran, resettlement of Bhutanese refugees are explored in the chapters. It also analyzes the impact on wage inequality due to emigration, the crucial role of social capital in migration decisions, and socio-economic vulnerabilities of women migrants in India. This book provides a clear understanding of international and internal migration in South Asia for students and academics, and a valuable resource for policy-makers and planners in development studies, regional development, and South Asian studies.

This book provides comprehensive and up-to-date information on the various elements of business environment. It has been designed as per the requirements of the students of business management, commerce, and economics.

First published in 1993. Routledge is an imprint of Taylor & Francis, an informa company.

Designed for the undergraduate, introductory environmental geology course for majors and non-majors alike, *Environmental Geology Today* presents the core geological principles and explores the effects of humanity on the physical environment. Contemporary case studies throughout encourage students to use their critical thinking skills to dissect the subject matter as part of their overall analysis. The numerous case studies are drawn from topical current events that relate to the chapter material and contain numerical data. Using simple math, graphing, and critical thinking, the authors challenge students to analyze aspects of the data, honing their basic math and analytical skills. With a focus on teaching students to think critically about our environment, *Environmental Geology Today* is a fresh and modern exploration of this ever-evolving field.

A unique strategic opportunity beckons Bangladesh. Dhaka, the economic powerhouse of the country, stands on the cusp of a dramatic transformation that could make it much more prosperous and livable. Today, Dhaka is prone to flooding, congestion, and messiness, to a point that is clogging its growth. But toward its east, where two major highway corridors will one day intersect, is a vast expanse of largely rural land. And much of it is within 6 kilometers of the most valuable parts of the city. The time to make the most of this eastward opportunity is now. Many parts of East Dhaka are already being developed in a haphazard way at an alarmingly rapid pace. Private developers are buying land and filling it with sand so they can build and sell new houses and apartments. Canals and ponds are disappearing, and the few narrow roads crossing the area are being encroached by construction. This spontaneous development could soon make East Dhaka look like the messy western part of the city, and retrofitting it later will be more difficult and costlier than properly planning and developing it now. Toward Great Dhaka: A New Urban Development Paradigm Eastward seeks to analyze how the opportunity of East Dhaka could be realized. Using state-of-the-art modeling techniques, the study simulates population, housing, economic activity, and commuting times across the 266 unions that constitute Greater Dhaka. It does so under various scenarios for the development of East Dhaka, but always assessing the implications for the entire city. The simulations suggest that pursuing a strategic approach to the development of East Dhaka would make Greater Dhaka a much more productive and livable city than continuing with business as usual. Based on current trends, Greater Dhaka would have a population of 25 million in 2035 and an income per capita of US\$8,000 at 2015 prices. However, embracing a strategic approach would add 5 million people to the city. And, it would be a more productive city, with nearly 1.8 million more jobs and an income per capita of more than US\$9,200 at 2015 prices, enough to put Dhaka on the map of global cities.

This publication contains information on the parasites of Bangladeshi fishes, based on a literature review dating from the earliest known records to the end of 2000. Information is presented in the form of parasite-host and host-parasite lists, and includes 147 named species as well as many records of parasites not identified to species level.

As our increasingly globalized world alters the dynamics of migration, the ideas that migrants have about returning to their home countries have evolved as well. This diverse collection examines the changes and complexities of migration patterns in a range of Asian countries and cities, exploring how globalization and transnationalism shape and give meaning to the migrant experience. From Japanese-Brazilian transmigrants and Filipina students in Ireland to skilled migrants from India, the authors address migrants' backgrounds, ambitions, and opportunities to offer intriguing insights and propose fascinating new questions about the lives of migrants in today's world.

Between 1991 and 2010, Dhaka's population more than doubled to 15 million. Simultaneously, the city's contribution to the national economy almost trebled. Clearly, population growth was accompanied by an unmistakable trend of economic growth, and a significant decline in urban poverty and income inequality. On the other hand, Dhaka's high population density exacerbated serious environmental challenges, and it was soon ranked as one of the world's least livable cities. In the context of these contradictory signals of rapid urbanization, Dhaka's Changing Landscape sets to answer three most intriguing questions: Are the poorer segments of urban population, which migrate with dreams for better lives, benefiting from positive economic trends? Are these benefits sustainable? Are these benefits

creating scope for this group to have a stake in the city's growing prosperity? By studying 600 households and applying comparative analysis over a span of 20 years, the authors examine demographic and economic trends to understand the patterns, scale, and complexity of urban poverty, income inequality, and rural–urban migration. Going beyond the space and poverty debate, they enlighten the readers about the quality of life questions, sustainability matters, and gender and generational roles and relations necessary to understand qualitative transformation and migrants' prospects for a better future.
