simulated clinical situations. A 100-question final exam at the end of the book. You'll also find proven techniques and tips to help you study more effectively, learn how to approach different types of questions, and improve your critical-thinking skills.

Based on candid interviews with 35 nurses who were deployed for the wars in Iraq and Afghanistan, this is the first book to reveal the stresses and moral dilemmas they experienced as they transitioned back into everyday life. The nurses share their difficulties with family separation, clinical

Newborn Nursing 2010
Proctored Assessment

reassignments, post-traumatic stress disorder, the perceived stigma of seeking mental health counseling, and compassion fatigue. They describe how "doing nursing" in a war zone changed them personally and expanded their nursing skills, and how reintegration was more difficult than they had anticipated. In addition to serving as a personal account of the experiences, both individual and collective, of these military nurses, the book will serve researchers as a compelling example of qualitative, phenomenological, and descriptive research.

Newborn Nursing 2010
Proctored Assessment

Interviewees describe in vivid detail their homecoming, family adjustments, renegotiation of spousal and parenting roles, domestic and workplace challenges, and many other dilemmas posed by the reintegration process. They provide insights and thoughtful recommendations for changes to current military debriefing to improve the experiences of future wartime nurses. Encompassing all three branches of the military, the book also examines the differences between active duty services and reserve unit services, issues of substance

Covers all types of NCLEX-style questions for greater test familiarity Incorporates online resources for use in clinical settings Develops critical thinking skills to help students "think like a nurse"

Maternal-newborn nursing is multi-faceted, challenging and rewarding. It provides multiple opportunities to touch lives and make a difference. In the new edition, those facets and their impact on maternal-newborn nursing is evident, while emphasizing that family members are co-participants in care. Because of the varied and rich opportunities for nurses,

Access Free Rn Maternal
Newborn Nursing 2010
Proctored Assessment

the theme emphasized in this edition are the many facets of maternal-newborn nursing. This thread is subtly woven throughout the book.

Saunders Comprehensive Review for the NCLEX-RN Examination

Saunders 2014-2015 Strategies for Test Success - E-Book

Care of the Childbearing & Childrearing Family

Here's all of the crucial coverage you need to succeed in class and confidently prepare for the NCLEX-RN®. From nursing theory, legal and ethical issues, and leadership and management to psychological support, infection control and medication administration—easy-to-follow outlines in every chapter review exactly what you need to know. The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends more on childbirth than any other country in the world, yet

outcomes are worse than other high-resource countries, and even worse for Black and Native American women. There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. Birth Settings in America: Outcomes, Quality, Access, and Choice reviews and evaluates maternal and

newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings research, and access to and choice of birth settings.

An all-inclusive guide to fundamentals and medical-surgical nursing for the LPN/LVN, Foundations and Adult Health Nursing, 7th Edition covers the skills you need for clinical practice, from anatomy and physiology to nursing interventions and maternity, neonatal, pediatric, geriatric, mental health, and community health care. Guidelines for patient care are presented within the framework of the five-step

nursing process; Nursing Care Plans are described within a case-study format to help you develop skills in clinical decision-making. Written by Kim Cooper and Kelly Gosnell, this text includes all of the content from their Foundations of Nursing and Adult Health Nursing books, including review questions to help you prepare for the NCLEX-PN® examination! Full-color, step-by-step instructions for over 100 skills show nursing techniques and procedures along with rationales for each. The 5-step Nursing Process connects specific disorders to patient care - with a summary at the end of each chapter.

Nursing Care Plans emphasize patient goals and outcomes within a case-study format, and promotes clinical decision-making with critical thinking questions at the end of each care plan. Clear coverage of essential A&P is provided by an Introduction to Anatomy and Physiology chapter along with an overview of A&P in all body systems chapters. Student-friendly features enhance the learning of nursing skills with summary boxes for Patient Teaching, Health Promotion Considerations, Complementary and Alternative Therapy, Cultural Considerations, Older Adult Considerations, Home Care

Considerations, Safety Alert, and Prioritization, Assignment, and Supervision. UNIQUE! Mathematics review in Dosage Calculation and Medication Administration chapter covers basic arithmetic skills prior to the discussion of medication administration. A focus on preparing for the NCLEX examination includes review questions and Get Ready for the NCLEX Examination! sections with key points organized by NCLEX Client Needs Categories. Evidence-Based Practice boxes provide synopses of nursing research articles and other scientific articles applicable to nursing, along with nursing

implications for the LPN/LVN. Nursing Diagnosis boxes summarize nursing diagnoses for specific disorders along with the appropriate nursing interventions. UNIQUE! Delegation Considerations boxes provide parameters for delegation to nurse assistants, patient care technicians, and unlicensed assistive personnel. Medication Therapy tables provide quick access to actions, dosages, precautions, and nursing considerations for commonly used drugs. NEW! Reorganized chapters make it easier to follow and understand the material. NEW! Icons in page margins

indicate videos, audios, and animations on the Evolve companion website that may be accessed for enhanced learning. UPDATED illustrations include photographs of common nursing skills. This full-color LPN/LVN-level textbook presents maternity nursing using a nursing process framework. Throughout the text are features that help students develop critical thinking skills and apply content to practice—such as nursing procedures, nursing care plans, clinical pearls, patients' and caregivers' stories, critical thinking questions, cultural snapshots, family teaching tips, and over

200 illustrations. Each chapter is followed by an integrated study guide/workbook with NCLEX®-style questions, Critical Thinking: What Would You Do? scenarios including dosage calculations, and Study Activities including Internet activities. Introductory Maternity Nursing is an ideal complement to Hatfield, Broadribb's Introductory Pediatric Nursing, Sixth Edition. Instructors who prefer a combined maternity/pediatric text can use Klossner/Hatfield, Introductory Maternity and Pediatric Nursing. The Critical Components of

Fundamentals of Nursing

Introductory Maternity

Nursing

Maternal-Newborn Nursing

Maternal Newborn Nursing Care

Plans, Third Edition teaches students

and practicing nurses how to assess,

plan, provide, and evaluate care for

pregnancy, delivery, recovery,

abnormal conditions, and newborn

care. Featuring more than 65 of the

most common and high-risk care plans

for nursing care using the nursing

process approach, it includes NIC

interventions, discussions on

collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. Using a progressive approach, the text begins with generic care plans that address all patient situations regardless of the patient diagnosis or condition before moving on to more complicated and specific care plans.

Written by the foremost experts in maternity and pediatric nursing, Maternal Child Nursing Care, 5th Edition offers the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX® examination. This new edition offers numerous content updates throughout the text to keep you up-to-date on the latest topics and best practices. Plus hundreds of

illustrations, alert boxes, and tables clarify key content and help you quickly find essential information. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop your analytical skills and apply knowledge in various settings. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Expert authors of the market-leading maternity and pediatric nursing

textbooks combine to ensure delivery of the most accurate, up-to-date content. Family-Centered Care boxes highlight the needs or concerns of families that you should consider to provide family-centered care. NEW! Content updates throughout the text give you the latest information on topics such as the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, shaken baby syndrome/traumatic brain injury, Healthy People 2020, car restraints, immunizations, and childhood obesity. NEW! Updated Evidence-Based Practice boxes including QSEN KSAs (knowledge, skills, attitudes) provide the most current practice guidelines to promote quality care. NEW! Medication Alerts stress medication

safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

The seventh edition of this textbook for nursing undergraduates "encompasses the core aspects of evidence-based maternal-child nursing in health and illness, incorporating updates in clinical care and technology."--Page xi.

Prepare for success on your HESI exit exam and the NCLEX-RN®! HESI Comprehensive Review for the NCLEX-RN® Examination, 4th Edition provides a comprehensive, all-in-one review of the information you need to know. Written in an easy-to-read

Access Free Rn Maternal
Newborn Nursing 2010
Proctored Assessment

outline format, this study tool breaks down chapters by clinical areas and concepts emphasized on the NCLEX-RN exam. Rationales are provided for any incorrect answers or areas of weakness. The companion Evolve website offers approximately 700 practice questions, giving you valuable practice in the same electronic testing format you will experience on your nursing school exit exam and on the NCLEX-RN exam. HESI Hint boxes highlight important clinical information and concepts commonly tested on the NCLEX-RN exam. Critical thinking study questions reinforce key concepts and content, and also include answer guidelines. Updated content reflects the 2013 NCLEX-RN test plan. New! More test

Edition makes it easy to**

understand the essentials of women's health, maternity, and children's nursing care. It simplifies the steps of the nursing process and relates them to care, helping you develop clinical judgment skills and provide safe, effective care in evidence-based practice. This edition adds case studies preparing you for the new Next Generation NCLEX® examination. Best of all, active learning tools and features make it fun to master nursing concepts, offering plenty of opportunities to apply your

knowledge to the practice setting. Nursing Care Plans help students apply the nursing process to plan individualized care in the most common maternity and pediatric situations. Clinical Reference sections in pediatrics chapters provide basic information on disorders and their related anatomy and physiology, differences in body systems between children and adults, commonly used drugs, lab values, diagnostic tests, and procedures. Clinical Judgment boxes highlight situations

designed to test clinical judgment skills. Health Promotion boxes highlight information needed to perform a comprehensive assessment of well infants and children at various ages. Safety Alerts emphasize what is important to remember when providing safe and optimal quality care.

Pathophysiology boxes present an illustrated overview of illnesses and how to manage them. Want to Know boxes provide teaching guidelines, including sample answers

for questions that are likely to be asked or topics that need to be taught.

Communication Cues offer practical tips for verbal and nonverbal communication with patients and families.

Glossary at the end of the book gives students quick access to all key terms and definitions. NEW! Next

Generation NCLEX® (NGN) examination-style case studies expose students to how content will be tested in the exam; case studies are either single-situation or unfolding studies. NEW!

Updated Drug Guides

summarize the latest information on medications. The #1 maternity book in the market is getting even better. Maternity and Women's Health Care, 11th Edition provides evidence-based coverage of everything you need to know about caring for women of childbearing age. Not only does this text emphasize childbearing concerns like newborn care, it also addresses wellness promotion and management of women's health problems. In describing the continuum of care, it integrates the

importance of understanding family, culture, and community-based care. Boasting new medication alerts and updated content throughout, this edition covers the new maternal levels of care, and the revised AAP policy on breastfeeding and infant sleep. Expert authors of the market-leading maternity nursing textbook deliver the most accurate, up-to-date content. Clinical reasoning case studies provide you with opportunities to test and develop your analytical

skills and to apply knowledge in various settings. Community Activity boxes focus on maternal and newborn activities that can be pursued in local community settings and illustrate nursing care in a variety of settings. Cultural Considerations stress the importance of considering the beliefs and health practices of patients from various cultures when providing care. Emergency boxes provide information about various emergency situations and offer a quick reference in critical

situations. Family-Centered Care boxes highlight the needs and concerns of families that you should consider to provide family-centered care. Medication guides provide an important reference of drugs and their interactions. Nursing care plans include rationales for interventions and provide you with an overview of, and specific guidelines for, delivering effective nursing care. Safety alerts highlighted and integrated within the content draw attention to developing competencies related to

safe nursing practice. Signs of potential complications highlight vital concerns, alerting you to signs and symptoms of complications and the immediate interventions to provide.

Teaching for Self-Management boxes highlight important information that nurses need to communicate to patients and families for follow-up care.

Ensure your students' success on the NCLEX-RN exam with Cengage Learning's COMPLETE REVIEW FOR NCLEX-RN ,

Second Edition. After completing a recognized nursing curriculum and meeting state requirements, your students are ready to tackle the National Council of State Boards of Nursing NCLEX-RN exam, and this review covers it all. The stimulating, full-color text offers more than 1600 practice questions with answers in multiple formats, with 67 chapters of review content. Test questions are coded to reflect the recommended test-taking plan and strategies, while answers include rationales

for both correct and incorrect assumptions. Endorsed by the National Student Nurses Association (NSNA), COMPLETE REVIEW FOR NCLEX-RN, Second Edition emphasizes delegation, prioritization, and critical thinking methods that prepare students for the exam's rigor and also builds their confidence. COMPLETE REVIEW FOR NCLEX-RN, Second Edition is the one-stop NCLEX-RN exam preparation tool recognized by successful registered nurses today. Important

Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Featuring the most accurate, current, and clinically relevant information available, Perry's Maternal Child Nursing Care in Canada combines essential maternity and pediatric nursing information in one text. Comprehensive coverage includes promotion of wellness and the care for persons experiencing

common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health concerns, including physiological dysfunctions and special needs and illnesses, are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Medication Alerts stress medication safety concerns for better

therapeutic management. Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice. Research Focus boxes identify best practices by presenting evidence and how to apply the knowledge learned. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community

issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Clinical reasoning case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Cultural Awareness boxes explore beliefs and practices about pregnancy, childbirth, parenting, women's health concerns, and caring for sick children. Evidence-Informed Practice boxes highlight findings that confirm effective practices or that identify practices with

unknown, ineffective, or harmful effects. Emergency boxes alert you to emergency situations and guide you step-by-step through emergency procedures. Family-Centred Care boxes highlight the needs or concerns of families that you should consider in providing family-centred care. Guidelines boxes outline nursing procedures in an easy-to-follow format. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting.

Medication Guide boxes include key information about medications used in maternity and newborn care, including their indications, adverse effects, and nursing considerations. Patient Teaching boxes assist you in helping patients and families become involved in their own care with optimal outcomes.

NCLEX-RN® Alternate-
Format Q&A

From prenatal through postpartum care, Gloria Leifer's Maternity Nursing: An Introductory Text provides an essential foundation for promoting the health and wellness of mothers and newborns. This edition includes the latest advances and practice standards in maternity nursing care, highlighting Healthy People 2020 and the 2011 Joint Commission National Patient Safety Goals. Part of the popular LPN Threads series, this text addresses the knowledge, skills, and scope of practice appropriate for LPN/LVN

and LPN/LVN-to-ADN ladder programs. Chronological organization of content follows a sequence from family issues, fetal development, pregnancy, labor, birth, and care of the newborn, to postpartum issues with special social, familial, and cultural considerations. Organization of concepts in each chapter by simple to complex and from health to illness makes it easier to locate and understand the material. Complete, concise coverage includes a table of physiologic and psychosocial changes throughout the pregnancy, unique content on CPR for the pregnant patient and infectious diseases acquired during pregnancy, a pictorial story of a vaginal birth,

cultural considerations of pregnancy and maternal care, and nursing responses to loss, death, and grief.

UNIQUE! A FREE Study Guide in the back of the book reinforces understanding with multiple-choice, fill-in-the-blank, scenario-based clinical situation questions, and online activities. Nursing Care Plans with critical thinking questions help in understanding how a care plan is developed, how to evaluate care of a patient, and how to apply your knowledge to clinical scenarios.

Health Promotion boxes and content focus on family-centered care, health promotion, illness prevention, and women's health issues. Clinical Pathways use an interdisciplinary, collaborative-care approach in

tracking interventions along a timeline from assessment to discharge and follow up. Online resources for further research and study are included at the end of each chapter. UNIQUE! LPN Threads make learning easier, featuring a 10th-grade reading level, key terms with phonetic pronunciations and text page references, chapter objectives, special features boxes, and full-color art, photographs, and design.

Be prepared for the alternate-item format questions in the new, 2010 NCLEX-RN® Test Plan. You'll find more than 500 alternate-item format questions—including the new audio, graphic, and video questions that are featured on the exam.

"[A] great guide and resource for a nurse at any level who wishes to construct and present a professional nurse portfolio."--Journal for Nurses in Professional Development
"With an academic portfolio nursing faculty members can monitor their career development and present their work for others to review and critique. This is an easy-to-read book that will serve as a valuable resource for nursing faculty members in developing their academic portfolios." Marilyn H. Oermann, PhD, RN, FAAN, ANEF Professor and Chair of Adult and Geriatric Health School of Nursing University of North Carolina at Chapel Hill

**Using the Fast Facts style of concise, easy-to-access information, this book is the only comprehensive guide to creating an outstanding professional academic portfolio for entry into, and promotion and tenure within, an academic nursing setting. It is designed for recent nursing graduates who want to teach, faculty who need to polish their academic portfolio, and individuals already established in academia who seek promotion or tenure. This volume will help nursing academics: Assess their strengths and weaknesses
Write a personal statement
Demonstrate their teaching skills
Showcase their research/scholarship
Organize and present their portfolio
Develop an E-portfolio The book**

provides clear guidelines on what to include in a professional portfolio, and elements to highlight when seeking work in a specific discipline or academic role. It describes pitfalls to be avoided and how to insure effective coverage of teaching, scholarship, and service, as well as addresses the differences between systems and policies of academia, versus those of community college nursing programs and diploma schools of nursing. This guide also helps prepare nurses for the rigors of promotion and tenure by clarifying what to expect and how candidates are evaluated. Numerous examples illustrate actual professional faculty experience and include personal statements written

by successful nurse educators. Key Features: Provides a concise, step-by-step guide for aspiring, new, and experienced nurse faculty who need to prepare an outstanding professional portfolio for promotion and tenure Organized for quick access to types of content to be included in portfolio Includes numerous examples from real-life portfolios Features "Fast Facts in a Nutshell" to clearly guide new nurse faculty Provides recommendations for achieving academic advancement Based on SBAR (Situation, Background, Assessment, and Recommendation) method of communication Contemporary Maternal-newborn Nursing Care

Plans with Critical Thinking

Questions reinforce the nursing process and strengthen problem-solving skills as applied to maternity nursing. Logical organization of content from simple-to-complex and health-to-illness makes locating and accessing information easy. Key terms with phonetic pronunciations and text page references help improve terminology and language skills of English-as-a-Second-Language (ESL) students and students with limited proficiency in English, before they enter

clinical practice. Health Promotion boxes emphasize the importance of family-centered care, health promotion and illness prevention, women's health issues, and growth and development of child and parent to help you understand and teach wellness and disease prevention to patients in your care. Nutrition content highlights the importance of proper nutrition for women before, during, and after pregnancy (for those who are breastfeeding), as well as critical information about

the nutrition needs and problems of newborns, infants, and children.

Nursing Tips throughout provide pertinent information applicable in the clinical setting that reinforces what you have just learned while building on previously learned information. NEW!

Unfolding case studies with illustrations follow first-time parents Tess and Luis throughout the stages of pregnancy and birth of their twins, with a series of critical thinking questions. NEW! Updated NCLEX exam-

style review questions have been revised to a higher cognitive level to better reflect the NCLEX examination. NEW!

Expanded coverage of bioterrorism and natural disasters better reflects the evolving role of the nurse in disaster situations. NEW!

Enhanced appendix includes Pediatric Lab Values for quick and easy reference.
