*Japan's rapid rise to economic super-power status has led to a worldwide interest in and attempts to emulate Japanese management practices. This book, based on extensive original research, considers both the opportunities and problems of the transfer of Japanese management practices to other areas in East Asia. It remains one of the few books of its kind, as other books on Japanese management have concentrated on its transferability to the West. Because many Japanese subsidiaries have been established longer in East Asia than elsewhere and the local work forces have become accustomed to Japanese management practices when transferred elsewhere have become apparent in a way they have not where Japanese management practices are much newer.*

In 2003, stamp duty land tax (SDLT), an entirely new tax applying to acquisitions of UK land, was introduced. Property lawyers and their tax colleagues had to learn a new set of rules and procedures as they familiarized themselves with the new regime. Several practical and legal difficulties emerged, and the system continues to change to accommodate these and other problems as they arise. This book takes a practical approach, looking at SDLT as it applies to particular transactions and dealing with issues which the property lawyer is likely to face when advising a client, whether acting in a straightforward purchase of freehold land or negotiating the structure of a complex commercial sale or acquisition. This second edition includes guidance on the many changes that have recently been made to the SDLT process, in particular to completing and filing the SDLT return itself, as well as dealing with the additions to SDLT law, such as HM Revenue & Customs' new powers to combat avoidance.

**In response to a clear need by low-income people to gain access to the full range of financial services including savings, a growing number of microfinance NGOs are seeking guidelines to transform from credit-focused microfinance organizations to regulated deposit-taking financial intermediaries. In response to this trend, this book presents a practical 'how-to' manual for MFIs to develop the capacity to become licensed and regulated to mobilize deposits from the public. 'Transforming Microfinance Institutions' provides guidelines for regulators to license and regulate microfinance providers, and for transforming MFIs to meet the demands of two major new stakeholders regulators and shareholders. As such, it focuses on developing the capacity of NGO MFIs to mobilize and intermediate voluntary savings. Drawing from worldwide experience, it outlines how to manage the transformation process and address major strategic and operational issues inherent in transformation including competitive positioning, business planning, accessing capital and shareholders, and how to 'transform' the MFI's human resources, financial management, MIS, internal controls, and branch operations. Case studies then provide examples of developing a new regulatory tier for microfinance, and how a Ugandan NGO transformed to become a licensed financial intermediary. This book will be invaluable to regulators and microfinance NGOs contemplating institutional transformation and will be of tremendous use to donors and technical support agencies**
