Nashville may be the country music capital, but local hockey fans know it as Smashville. The Predators adopted their name from the bones of a saber-toothed tiger found beneath a local building. Craig Leipold first purchased the expansion rights in 1997, and the team quickly built a loyal following. It won twenty-eight games in the inaugural season. Twelve seasons later, the team finished second in the Central Division and appeared in its first-ever conference semifinals. One year later, it finally dispatched its long-standing rival Detroit Red Wings 4– 1 in the opening round of the playoffs. Author Justin Bradford details the fascinating history through unique player anecdotes and perspectives from those involved in the team's rise to prominence.

This informative and richly illustrated book by master scratchboard artist, Diana Lee, has just about everything you need to know on the subject of working in the scratchboard medium. Offering a wealth of information on tools and techniques, Starting From Scratch also contains exercises that you can use to create your own pieces, as well as detailed demonstrations that show how the author achieves the incredible realism for which her work is known.

The approach described in this book is different from that in most student texts, and has been very successful in practice, starting almost from scratch, but omitting many of the 'basics' such as the details of hematopoiesis, laboratory technology, and so on, which are hardly relevant to the practising clinician and student in the wards, and are primarily of interest to the hematologist and sometimes to the clinical specialist. Considerable emphasis is given to the clinical history and examination, and the interpretation of the clinical patterns thus exposed. Hopefully it will overcome many of the traditional problems experienced in practical diagnostic haematology.

"With its generally clear exposition and a structure that is logical and even dramatic, this illuminating book deserves wide use in the classroom and beyond." --CANADIAN REVIEW OF STUDIES IN NATIONALISM, XXIX (2002) This book, written by one of the leading authorities on migration, traces the growth of global migration since 1945, showing how it has produced fundamental economic, social and cultural changes in most parts of the world.

From the outspoken and irreverent multi-million-copy bestselling author, here is the first trade paperpack publication of Brown's writing manual. Unlike most writers' guides, hers has as much to do with how writers live as with mastering the tools of their trade.

This book constitutes the refereed proceedings of the 7th International Conference on Model and Data Engineering, MEDI 2017, held in Barcelona, Spain, in October 2017. The 20 full papers and 7 short papers presented together with 2 invited talks were carefully reviewed and selected from 69 submissions. The papers are organized in topical sections on domain specific languages; systems and software assessments; modeling and formal methods; data engineering; data exploration and exp loitation; modeling heterogeneity and behavior; model-based applications; and ontology-based applications.

In her compelling reexamination of Djuna Barnes's work, Daniela Caselli raises timely questions about Barnes, biography and feminist criticism, identity and authority, and modernist canon formation. Through close readings of Barnes's manuscripts, correspondence, critically acclaimed and little-known texts, Caselli tackles one of the central unacknowledged issues in Barnes: intertextuality. She shows how throughout Barnes's corpus the repetition of texts, by other authors (from Blake to Middleton) and by Barnes herself, forces us to rethink the relationship between authority and gender and the reasons for her marginal place within modernism. All her texts, linked as they are by correspondences and permutations, wage a war against the common sense of the straight mind. Caselli begins by analyzing how literary criticism has shaped our perceptions of Barnes, showing how the various personae assigned to Barnes are challenged when the right questions are posed: Why is Barnes such a famous author when many of her texts remain unread, even by critics? Why has criticism reduced Barnes's work to biographical speculations? How can Barnes's hybrid, eccentric, and unconventional corpus be read as part of literary modernism when it often seems to sever itself from it? How can an oeuvre reject the labels of feminist and lesbian literature, whilst nevertheless holding at its centre the relationships between language, sexuality, and the real? How can Barnes's work help us to rethink the relation between simplicity and difficulty within literary modernism? Caselli concludes by arguing that Barnes's complex and bewildering work is committed to a high modernist notion of art as a supremely difficult undertaking whilst refusing to conform to standards of modernist acceptability.

In this book, Windy Dryden takes long-standing research on SSI therapy and transfers it to the field of CBT in a timely and conceptual application. This thoroughly updated new edition offers brand new chapters on single-session thinking. The book questions the common practice of predicating therapist training on the notion that therapy is an ongoing process. Based on his extensive work demonstrating the benefits of single-session CBT to public and professional audiences, Dryden has developed a single-session approach for work in the therapy and coaching fields. Comprising 30 key points, and divided into two parts – Theory and Practice – it concisely covers the key features of SSI-CBT. This book offers essential guidance for students and practitioners experienced in CBT, as well as practitioners from other theoretical orientations who require an accessible guide to the distinctive theoretical and practical features of this exciting new approach.

Terrestrial Ecosystem Research Infrastructures: Challenges and Opportunities reveals how environmental research infrastructures (RIs) provide new valuable insights on ecological processes that cannot be realized by more traditional short-term funding cycles and are integral to understand our changing world. This book bonds the latest state-of-the-science knowledge on environmental RIs, the challenges in creating them, their place in addressing scientific frontiers, and the new perspectives they bear. Each chapter is thoughtfully invested with fresh viewpoints from the environmental RI vantage as the authors explore and explain many topics such as the rationale and challenges in data management, distilling information into knowledge, and new developments in large-scale RIs. This work serves an advantageous guide for academics and practitioners alike who aim to deepen their knowledge in the field of science and project management, and logistics operations.

'Femme Digitale' opens with the history and basic concepts behind the representation of the female form in digital art, before providing a thorough explanation of the software involved together with a series of tutorials covering topics such as the manipulation of digital images and sampling skin textures.

An Act of Faith in the Resurrection

In this controversial new account of the history of medicine, David Wootton argues that, from the fifth century BC until the 1930s, doctors actually did more harm than good, and asks just how much harm they still do today.

In today's day and age, we are consumed by our cell phones. The term "there is an app for that" is relentlessly expanding. Almost everyone you meet has an idea for an app, a way to improve a current app, or owns a business that wants to join the bricks and clicks society. The overarching problem of why these apps never get developed comes down to funding; plain and simple. Lack of knowledge, courage, and confidence also play key factors, but let's be honest – it's all about the money. Unless you have a computer engineering background, rich parents, and high-level Silicon Valley connections, chances are your app will never make it. Here's an important fact - that's what the media and tech industry want you to think. Truth be told, you can build a successful app without needing Venture Capital, expensive coders, and a marketing budget that seeks to satisfy only the App Store or Google Play. APPetite™ will show you, step-by-step, how you can make your app idea not only a reality, but a profitable success!

Furthermore, you'll learn about JavaFX 8, now integrated into Java 8 and which gives you additional APIs that will make your game application more fun and dynamic as well as give it a smaller foot-print; so, your game application can run on your PC, mobile and embedded devices. After reading and using this tutorial, you'll come away with a cool Java-based 2D game application template that you can re-use and apply to your own game making ambitions or for fun.

Philip Tranter and three friends drove a Land Rover 6,000 miles overland from Scotland to Nuristan to explore some of the unknown Central Hindu Kush area. They set out to attempt the second ascent of the monstrous Koh-i-Krebek; to ascend if possible at least one other major unclimbed mountain and to map that previously unmapped terrain. In fact, as well as Krebek they climbed nine other major peaks, named another dozen, and established the existence of a dramatic rock and ice range which they called the Rum Mountains, and christened individually after the Hebridean peaks they resembled in shape and beauty. The story of the expedition is told with an infectious enthusiasm for the glory and challenge of these mysterious peaks.

Creating Sounds from Scratch is a practical, in-depth resource on the most common forms of music synthesis. It includes historical context, an overview of concepts in sound and hearing, and practical training examples to help sound designers and electronic music producers effectively manipulate presets and create new sounds. The book covers the all of the main synthesis techniques including analog subtractive, FM, additive, physical modeling, wavetable, sample-based, and granular. While the book is grounded in theory, it relies on practical examples and contemporary production techniques show the reader how to utilize electronic sound design to maximize and improve his or her work. Creating Sounds from Scratch is ideal for all who work in sound creation, composition, editing, and contemporary commercial production.

The Routledge Handbook on Spaces of Urban Politics provides a comprehensive statement and reference point for urban politics. The scope of this handbook's coverage and contributions engages with and reflects upon the most important, innovative and recent critical developments to the interdisciplinary field of urban politics, drawing upon a range of examples from within and across the Global North and Global South. This handbook is organized into nine interrelated sections, with an introductory chapter setting out the rationale, aims and structure of the Handbook, and short introductory commentaries at the beginning of each part. It questions the eliding of 'urban politics' into the 'politics of the city', reconsidering the usefulness of the distinction between 'old' and 'new' urban politics, considering issues of 'class', 'gender', 'race' and the ways in which they intersect, appear and reappear in matters of urban politics, how best to theorize the roles of capital, the state and other actors, such as social movements, in the production of the city and, finally, issues of doing urban political research. The various chapters explore the issues of urban politics of economic development, environment and nature in the city, governance and planning, the politics of labour as well as living spaces. The concluding sections of the Handbook examine the politics over alternative visions of cities of the future and provide concluding discussions and reflections, particularly on the futures for urban politics in an increasingly 'global' and multidisciplinary context. With over forty-five contributions from leading international scholars in the field, this handbook provides critical reviews and appraisals of current conceptual and theoretical approaches and future developments in urban politics. It is a key reference to all researchers and policy-makers with an interest in urban politics.

Mental health has been a rising topic of discussion today Worldwide- thanks to various professionals who have contributed towards spreading awareness and enabling people to seek help. As awareness continues to increase, there is a need to educate people about different kinds of mental health problems simultaneously. This book caters to exactly this requirement of today. Beginning from what is 'normal' behavior and what is not, the book clarifies one's understanding of psychological problems that a person can suffer from, and explains from scratch a plethora of psychiatric conditions in a manner that everyone can relate to - starting from depression to severe psychiatric problems like Schizophrenia. The best feature of the book is FAQs in every section, which caters to genuine questions arising in the minds of the readers. All concepts are explained with examples, and cases are discussed which help the reader relate with the real life implications of those problems. The book can contribute magnificently not only to removal of stigma, but also to avoid panic when one witnesses a person in vicinity suffering from these problems- since there are clear explanations of psychiatric treatment. The simple language makes the book suitable for people of all ages.

The book aims to acknowledge the complexity of working with clients who have an acquired brain injury but aims to give the interested reader practical and useable guides to develop their practice. Throughout the text, case studies and practical suggestions are forwarded to facilitate do-able practice. It is hoped that the book will become a gold standard in this particular area and is aimed at a range of professionals in training (for those responsible providing training in psychopathology, neuropsychology and psychotherapy), and those who have an interest in working with the issues commonly seen post acute brain injury rehabilitation settings.

This volume reviews and critiques the over forty different interpretations of 1 Cor 15: 29, then examines the verse anew in terms of its literary, historical, and theological contexts within the writings of Paul.

This book will be a practical guide to developing and implementing online courses. It is based on a model now in use at Paris Junior College in Paris, TX which has often resulted in retention rates of over 90%. It will be a comprehensive practitioner's guide including information on retention and multimedia support. This book will be a guide to anyone who may wish to teach online in any subject area at any level. The book provides actual examples of problems and solutions concerning online courses and also includes examples of supporting documents. Through a supporting Web site, the book will include actual examples of multimedia support now in use The book might also be used in graduate classes as a curriculum development guide. Readers would use the book as a guide as they actually create online courses. This would take most of the guess work out of course creation and provide a solid foundation for distance learning programs. The book provides a simple yet effective approach to online learning. It uses a model that has been proven to be effective with retention rates to support the contention. It provides information on a retention study and multimedia support as well, two areas that have not been addressed very often to this point.

An Old Flame Brings a Spark of New Hope En Alt Maedel—an old maid. At age twenty-nine, that's what Eva Lapp considers herself. And who could argue with her? Finding a good Amish husband at her age will be next to impossible. Plus, Eva's unwarranted bad reputation in Lancaster County precedes her. Maybe living the Englisch life would be better. Squeezed out of her childhood home by her brother's boisterous family, Eva finds lodging and a new job managing a small café at a local plant nursery. But the challenge of her new position isn't enough to distract from her current predicament. To Eva's surprise, her first love, Jake Miller, suddenly returns to Lancaster County. Flooded with emotions and filled with questions about Jake's past, can Eva trust what she's feeling? Jake and Eva face many obstacles in their quest for a fresh start in the community, but perhaps with God's help, they can find the redemption they both desperately need.
