

The Holographic Universe The Phenomenon Of Elasti

"Preferred Futuring" is a tool designed to bring deeper meaning and spirit into the workplace. This text presents real-life examples to illustrate how this practical process can be used as a tool for leadership, management, process improvement and organization alignment.

Many people believe in the Power of Positive Thinking, but no one has succeeded in credibly explaining how mere thoughts can tangibly influence future occurrences. To explain the connection, this book presents a new paradigm of nature and couples it with a convincing explanation of how our right brain hemispheres have a unique ability to tap into the hidden domain of the metaphysical. To support this premise, the reader is lightly exposed to the divergent worlds of physics and metaphysics and is then introduced to a new view of nature that undeniably links mind to matter. Important to its charge, the new perspective makes the case that the future can only be created with thoughts. In the final analysis, the author brings his readers through the necessary steps to put this knowledge to work to help them create their own realities.

At the Edge of Time is a startling new addition to the body of literature called reality theory. Donald W. Jarrell contends that there are two realities, one a virtual reality of time and space and a second reality beyond time and space. Many philosophers and physicists agree that time is only an illusion. The author takes this notion one quantum leap forward, using findings of quantum mechanics and neuroimaging to show that both time and our everyday world are illusions, that what we experience as time and space is an impenetrably real virtual reality. It may seem not appropriately scientific to take a theory of reality—the dual reality theory—and apply it to other areas of our world, as the author does, before the theory has been proven by experiment. Upon reading the book, it will be clear that, as with the hypotheses of dark energy and dark matter, it is not possible to definitively prove or disprove the theory; the universal laws of physics very effectively prevent this. The author, therefore, has chosen to turn that usual approach on its head. If the dual reality theory is correct, it should serve to explain our world in ways that allow us to understand, to change, and to accurately predict events. And these changes and predictions are themselves subject to testing by experiment (either of the laboratory or thought variety). The theory has been used, in At the Edge of Time, to explain phenomena such as time, wave function collapse, the space-traveling-twin saga, the many-worlds interpretation, Bell's theorem, particles in superposition, the holographic universe, and gravity. The author also has used the theory to explain some phenomena which scientists are frequently reluctant to write about, such as dreams and hypnosis. These were included because the theory should, if correct, shed light on these phenomena as well. The dual reality theory, in the opinion of the author, will enable the reader to understand phenomena that were opaque or not fully explained using other theories.

Whether the theory does in fact serve this purpose is for readers to decide.

Jesus the Shaman is comprehensive, non-conformist & paradigm shattering. This unique, gripping, revolutionary thoroughly researched book astounds the reader as it gives numerous examples of prophets transformative spiritual psychic experiences, each of which gave birth to and contributed to the birth and development of world religions. These shamans, mediums, (channels), sages, oracles, mystics and prophets are not only shown to span all ages and the globe but are shown to have founded world religions. Entirely turning the tables on religious orthodoxy and traditional Newtonian physics (but not quantum physics)this innovative, highly controvercial, meticulous research methodically draws on primary sources revealing the esteemed spiritual teachers and prophets such as Moses, Jesus, Mohammad had mediumistic gifts.The author has inimitably established beyond question that supernatural communications laid the foundation stones of the world's religions.This book unifies the origins of religions under a single paranormal concept and thereby does much to dispel the causes of histories and todays religious strife.Emanuel Swedenborg, the medium to Europe's royalty & governments taught that thought patterns during physical life determine the appropriate after death landscapes of animals and people irrespective of their religious affiliations.

The Borders of Normal

UFO's, Religious Miracles, Cattle Mutilation, and Other Unexplained Phenomena in the San Luis Valley

Renowned UFOlogist Christopher O'Brien blew the lid off the San Luis Valley--now he takes you even deeper into the world's most mysterious locale. The picturesque patch of land that stretches from Southern Colorado into Northern New Mexico, known as the San Luis Valley, has been home to some of the most astounding occurrences in North American history. More strange sightings have been reported from this area than from any other part of the country. Shrouded in mystery, a brave few have dared to explore the vast territory--Christopher O'Brien is one of those people. He first took us there in his classic work, The Mysterious Valley. Now he returns with even more astonishing stories, fascinating folklore, and probing insight than ever. Enter The Valley and you'll discover: -UFOs--an in-depth investigation of these SLV sightings -Local folklore--the Colorado Cannibal, a race of "underground dwellers," America's first serial killers, gnomes, Bigfoot, and more -Covert military activity and underground bases--what is the government trying to hide? -And much, much more!

The phenomenon of elastic clock synchronization in the brain - Universal Quantum Clock Theory

Are poltergeists energy fluctuations in the Zero Point Field? Could even the simple experience of déjà vu be explained by the quantum theory of parallel universes? Do thoughts have the energy to manifest and move physical objects? PSilence introduces readers to the latest discoveries in quantum physics and New Science that may explain the existence of paranormal phenomena—UFOs, ghosts, the Bermuda Triangle, energy vortices—and psychic abilities such as ESP, telekinesis, remote viewing, and recalling past lives. You'll explore the cutting-edge ideas that are fascinating both scientists and paranormal investigators, including: The latest theories of multiple universes and eleven dimensions. The Zero Point Field—is it the potential source of all creative energy? The potential of every human being to be a genius. The work of the world's leading scientists, researchers, philosophers and spiritual leaders—from noted physicists like Michio Kaku to the revered Dalai Lama—are beginning to accept the possibility of alternate realities and dimensions that warp time and space. PSilence takes the reader on a journey to where the "normal" and the paranormal intersect, where the known and unknown converge, where science and spirituality meet. In essence though utilizing arguments only from modern physics and its underlying logic, this work demonstrates how the very existence and also the particular form of our universe can be accounted for out of absolutely nothing. It showcases a comprehensive programme for the revival of Logicism and Logical Empiricism.

The Evolving Heart Nature's Astonishing Evolutionary Intention for Humanity The Heartbeat of Intelligence shows why we are not fulfilling our potential, as individuals and as a species. It shows how and why we stepped off the evolutionary path intended by Nature, a path which would have put us several evolutionary steps ahead of where we are now had we not strayed from it. The book shows how stepping off the path has severely jeopardized the mysterious connection between the heart and the brain, a connection which is essential for our continued evolution as a species. The author believes that we will not continue evolving or even survive as a species without that understanding. The book explains: •The theory of neoteny and why this is the most crucial aspect of human evolution. •Why synchronicity is the law by which human beings will live in the future. •How left-brain dominance has led to nearly all of the problems we face today. •Why Nature is far more profound and mysterious than science allows. •Why seeing the Universe as a hologram answers so many puzzling questions. Love and compassion, passion and joy, goodness and beauty, are the birthright of every human being, built into our genes and intended by Nature to speak in every beat of our heart. The book shows us the delightful steps of joy and lightness which will not only take us several evolutionary steps forward, but will help us save our beautiful planet. Astonishingly, this could all be accomplished in less than a generation .

Holography has recently become a field of much interest because of the many new applications implemented by various holographic techniques. This book is a collection of 22 excellent chapters written by various experts, and it covers various aspects of holography. The chapters of the book are organized in six sections, starting with theory, continuing with materials, techniques, applications as well as digital algorithms, and finally ending with non-optical holograms. The book contains recent outputs from researches belonging to different research groups worldwide, providing a rich diversity of approaches to the topic of holography.

The human condition is a strange one at best. Finding ourselves in a world nearly void of any profound natural predators, with the ability to unconditionally love and solve the most complex problems in the most creative ways; we choose to make the world an ever increasingly dangerous place, in stead of creating Utopia. In our relentless pursuit of happiness and perfection, we create the very opposite. The Sleeper Must Awaken dives deep into the human psyche, exploring from the archetypal dreamscapes of our subconscious minds to the remarkable similarities between Super String Theory and ancient mysticism. It opens the door to a journey within ourselves, searching for the root of this phenomenon and presenting possible solutions to a world on the edge. Author Bio Dr. Jean Erasmus is a South African born medical practitioner. Before moving to the United Kingdom, he has worked mostly with less fortunate souls, managing a wide variety of illnesses, ranging from Tuberculosis to HIV/AIDS. He has also been involved in medical legal work as well as lecturing in Primary Health Care. The world of medicine - where cold, evidence-based science intermingles with the warm, complex, emotional and spiritual human being - has sparked an interest in Jean, leading him to pursue the connection between these two diverse poles of the human condition. This pursuit, offset by the dramatically changing physical, social and spiritual landscape of the world, led him into writing this book in an attempt to finding the missing piece of the current human-led world puzzle, and to present possible solutions.

This book explores the concept that the reality which is created by the consciousness inherent in the Western worldview is exceptionally limiting and probably unsustainable. After describing the contexts within which the book was written the author documents his personal journey in search of wholeness and meaning. From his experience of this journey he suggests that the wisdom, insight, and praxis contained within - what he describes as the meta-narratives of - Holism, Indigenous cultures, and Eastern traditions are manifestations of a holistic consciousness. The author explores the concept that a shift to such a holistic consciousness is required in order to redress the imbalance that is evident in all humanity's relationships, and he suggests that enabling such a shift in consciousness would have deep implications for the concepts and contexts of community, adult learning, meaningful work, and sustainability.

How Physics and Metaphysics Shape Your Future

A Mind-Expanding Journey Into the Realm Where Psyche and Physics Meet

Preferred Futuring

Many people believe in the power of positive thinking (i.e., how thoughts and attitude can shape their future) yet, despite a plethora of books on this subject, no previous author has credibly explained how mere thoughts are able to tangibly influence future events. To explain the connection, Dr. Donlan presents a new paradigm of nature coupled with a viable explanation of how our right cerebral hemisphere has evolved circuitry that can tap into the hidden domain of the metaphysical. To support this premise, he exposes the reader to the worlds of physics, metaphysics, brain architecture, and evolution. Donlan then introduces the many problems associated with the current model and contrasts it with a new view which remedies many of the issues facing theoretical physicists today. Important to its central theme, the book's proposed paradigm supports the remarkable notion that the future can only be created with thoughts. In the final analysis, the author brings his readers through the necessary steps to put this knowledge to work to help them (pre)ordain their own realities.

This book introduces a variety of aspects in nonperturbative Quantum Chromodynamics (QCD), focusing on the topological objects present in gauge theories. These objects, like magnetic monopoles, instantons, instanto-dysons, sphalerons, QCD flux tubes, etc, are first introduced individually and, later, treated collectively. As ensembles, they produce various phenomena that can be modeled numerically in lattice gauge theories and such collective effects, produced on the lattice, are extensively discussed in some chapters. In turn, the notion of duality, which is crucial in modern field/string theories, is elucidated by taking into consideration the electric-magnetic duality, the Poisson duality, and the AdS/CFT duality.This monograph is based on various lectures given by Edward Shuryak at Stony Brook during the last three decades and it is meant for advanced graduate students and young researchers in theoretical and mathematical physics who are willing to consolidate their knowledge in the topological phenomena encountered in fundamental QCD research.

DREAMS THAT COME TRUE TELEPATHY, ESP, VISIONS, PREMONITIONS NEAR-DEATH AND OUT-OF-BODY EXPERIENCES Most of us have heard stories of these unusual phenomena, as told by millions of people throughout history and across cultures. Or perhaps we have experienced them ourselves, and we are still grappling with their validity in a world of empirical science and psychiatry that deems anything unseen or spiritual as impossible, weird, or even disturbed. The stigma surrounding the paranormal prevents us from exploring the possibility that there are, perhaps, events that occur outside the realm of human comprehension, inoculating us against the lessons and spiritual significance these events might hold. As an experienced psychiatrist, Dr. Manuel Matas is very familiar with the science of the human brain—as well as the possibilities that exist beyond the known borders of consciousness. He has never been a classic rationalist, as he himself has experienced phenomena that defy logic and the explanations of Western medicine. In The Borders of Normal, Dr. Matas reveals just how accepted (and studied) many of these phenomena are, providing a compelling overview of influential thinkers who have, over the years, recognized events and experiences that fall outside the realm of current scientific thought. As a proponent of a nuanced, respectful approach that lies between belief and scepticism, Dr. Matas helps us to view paranormal experiences as normal and indeed endemic to the human species, for it is in this space of the unknown that we may learn more about ourselves, each other, and the bodies and worlds that we inhabit.

For centuries mankind has been exploring the nature of reality. The materialistic scientific worldview would have us believe that physically measurable phenomena are all that exist. Yet the answers to the key of reality go far beyond this mindset. This book explores the clues we have about the nature of reality, especially those aspects that cannot yet be proven. If we can understand the most baffling aspects of reality, then we will move closer toward understanding its ultimate cause and nature.

The Dreaming Universe

Interaction of Information and Energy as the Primary Cause for origination of the Creative Activity of Self-Consciousness Focus and the Macrocosmos in whole

Examines holography--a new theory of reality that explains the paranormal abilities of the mind, the latest frontiers of physics, and the unsolved riddles of the brain and body--exploring its implications for our universe

Topics of complex system physics and their interdisciplinary applications to different problems in seismology, biology, economy, sociology, energy and nanotechnology are covered in this new work from renowned experts in their fields. In particular, contributed papers contain original results on network science, earthquake dynamics, econophysics, sociophysics, nanoscience and biological physics. Most of the papers use interdisciplinary approaches based on statistical physics, quantum physics and other topics of complex system physics. Papers on econophysics and sociophysics are focussed on societal aspects of physics such as, opinion dynamics, public debates and financial and economic stability. This work will be of interest to statistical physicists, economists, biologists, seismologists and all scientists working in interdisciplinary topics of complexity.

Explores psychological, physiological, and anthropological aspects of consciousness and dreaming, looking at the history of dream research from the ancient Greeks to modern experiments, and applying theories from quantum physics to human consciousness.

This book presents the beginning of an overall 20-volume information series titled "The Good News", which consists of "Iissiidiology. Fundamentals", "Commentaries to Fundamentals", and author's Song Lyrics with a highly-spiritual content written to popular and all-loved melodies. From the very beginning, the author pinpoints the reader's attention upon fundamental notions of Iissiidiology starting from basic, axiomatic Conceptions. The book contains the newest interpretation of formation of the outer reality based on the Self-Consciousness' Focus Dynamics as the main functional mechanism of the Macrocosmos' Creative Activity. A detailed comparison of the author's hypotheses with existing scientific conceptions allows to draw parallels with the current worldviews about nature, space, time, energy and to find the ways for their radical transformation and potential development. In this volume, the author introduces the conceptual foundation necessary for an adequate understanding of all other Iissiidiology books of this series. Hierarchy of Self-Consciousness Levels, dimensional differentiation of manifestation Forms, classification of elementary (and other) particles as structural components of the Universal Plasmic-Differentiation Emission, information theory of the formation of Energy in the Macrocosmos are described in order to form necessary notions that will serve as the basis for further more complex iissiidiologic Categories: Universal Cosmic Laws and their Principles, Diapasons of Plasmic Forces, Evolutional and Involutional Branches of development, and many others. The first volume of Fundamentals is the required minimum for any reader who wants to thoroughly study iissiidiologic conceptions.

Moses and Jesus

Holography

The Heartbeat of Intelligence

The Sleeper Must Awaken

An Essay on Political Ethics

It is already clear that the creative principles we are using to guide our abstractions and to conceive the reality around us are obsolete and in urgent need of revision. Inspired by the holographic paradigm, as well as by some other concepts from quantum physics, this book suggests an alternative and contra-intuitive path, to help us reach the best results with the least effort in everything we do. But, it all comes at a price: the change in our way of thinking. This is a book for those who have already gone through the stages of heroes, methods, techniques and tools, but who are searching for more fundamental descriptions to think and create the future.

Evidence for The Superdeterministic Non-Dimensional Holographic Universe and Existence of God. The phenomenon of elastic clock synchronization in the brain - Universal Quantum Clock Theory.

"Questo volume include una descrizione dei primi risultati sperimentali relativi al Synchro Energy Project, un progetto nato circa due anni fa (2006), il cui obiettivo era quello di giungere ad una teoria in grado di unificare i concetti di Sincronicità (Junghiana), Non-Località e Collasso della funzione d'onda. Gli esperimenti sono stati condotti in un piccolo laboratorio nei pressi dell'Università di Losanna (Svizzera), con la collaborazione di Patrick Reimer (fisico teorico, PhD), Jean-Michel Bonnet (ingegnere elettronico, PhD) e Christine Duval (neuropsicologa e fisiologa). Questo libro quindi, espone e spiega per la prima volta, le basi teoriche e sperimentali a sostegno del "Principio di compensazione quantistica dei nuclei inconsci". Esso dona al lettore attento, degli ottimi spunti di riflessione relativi ad un ambito scientifico, ancora non completamente esplorato: quello sull'interazione tra psiche e materia. "

A new form of Protophysics discerns clues to a deeper form of reality: it lies before, after, beyond, and within the more familiar universe, which is described by mainstream physics. "Tractatus" is a philosophic approach; it tries to give the preliminary outlines for a corresponding "Philosophy in a New Key." It delineates an infinite "megaverse," which seems weird at first sight and comforting at the same time. Seemingly incompatible realms of experience such as "The Structure of the Megaverse," "The Frames for Unfolding and Evolution," "The Role of Cognition and Emotion in the Universe," "The Universality of Love," "The Reality of Prayer and God," "The Roots of Logic and Logos" fall into place: they appear to join in a harmonious whole. The New Philosophy relies on "biperspectivism" as the deepest structure in the Megaverse and in the human mind. Biperspectivism has many forms and names: "Energy vs. Information" is one of them. (Schopenhauer's "Wille und Vorstellung" is but an echo of it all.) In the view of this philosophy, a New Physics spontaneously begets a new METAphysics

Consciousness in a Virtual Reality Holographic Universe

Phenomenal World

Consciousness is a subject that both baffles and fascinates many people at the same time. In this book, author Terry Edwards explores the nature of Consciousness as a universal metaphysical phenomenon and describes how it affects us in this materialistic world. The idea of us living in a Virtual Reality is looked at and discussed, as is the idea of how systems and numbers influence us all.

Long-listed for the 2016 PEN/E. O. Wilson Literary Science Writing Award "An important book that provides insight into key new developments in our understanding of the nature of space, time and the universe. It will repay careful study." –John Gribbin, The Wall Street Journal "An endlessly surprising foray into the current mother of physics' many knotty mysteries, the solving of which may unveil the weirdness of quantum particles, black holes, and the essential unity of nature." –Kirkus Reviews (starred review) What is space? It isn't a question that most of us normally ask. Space is the venue of physics; it's where things exist, where they move and take shape. Yet over the past few decades, physicists have discovered a phenomenon that operates outside the confines of space and time: nonlocality-the ability of two particles to act in harmony no matter how far apart they may be. It appears to be almost magical. Einstein grappled with this oddity and couldn't come to terms with it, describing it as "spooky action at a distance." More recently, the mystery has deepened as other forms of nonlocality have been uncovered. This strange occurrence, which has direct connections to black holes, particle collisions, and even the workings of gravity, holds the potential to undermine our most basic understandings of physical reality. If space isn't what we thought it was, then what is it? In Spooky Action at a Distance, George Musser sets out to answer that question, offering a provocative exploration of nonlocality and a celebration of the scientists who are trying to explain it. Musser guides us on an epic journey into the lives of experimental physicists observing particles acting in tandem, astronomers finding galaxies that look statistically identical, and cosmologists hoping to unravel the paradoxes surrounding the big bang. He traces the often contentious debates over nonlocality through major discoveries and disruptions of the twentieth century and shows how scientists faced with the same undisputed experimental evidence develop wildly different explanations for that evidence. Their conclusions challenge our understanding of not only space and time but also the origins of the universe-and they suggest a new grand unified theory of physics. Delightfully readable, Spooky Action at a Distance is a mind-bending voyage to the frontiers of modern physics that will change the way we think about reality.

This book introduces the traditional and novel techniques required to study the thermodynamic and transport properties of quark-gluon plasma. In particular, it reviews the construction of improved holographic models for QCD-like confining gauge theories and their applications in the physics of quar-gluon plasma. It also discusses the recent advances in the development of hydrodynamic techniques, especially those incorporating the effects of external magnetic fields on transport. The book is primarily intended for researchers and graduate students with a background in quantum field theory and particle physics but who may not be familiar with the theory of strong interactions and holographic and hydrodynamic techniques required to study said interactions.

Where is your mind located? How does it interact with your body? When your body dies, does your mind die too, or does it have an afterlife? That's the mystery of existence. If humanity cannot answer these questions once and for all then it has no understanding of reality. Holography is what allows scientific materialism to be replaced by mathematical idealism. Holography allows the soul, rather than matter, to be considered the source of reality. Over 300 years ago, Leibniz, with his Monadology, adopted a holographic model of reality, whereby dimensionless monads created the illusion of the dimensional material world. The answer to existence has always been right in front of humanity – in the shape of mathematics. The spacetime universe of matter is nothing but an ontological hologram that comes inbuilt with mathematical forcefields that lend it the illusion of being solid. It's all in the math. Everything starts with unextended minds = dimensionless Fourier singularities = mathematical souls.

Solar Cells and Energy Materials takes an in-depth look at the basics behind energy, solar energy as well as future and alternative energy materials. The author presents insights into the current state-of-the-art of solar cells, including their basic science, inorganic, organic and Perovskite-type cells. The author also gives an outlook into next and sources. The focus of this book is not only the presentation of available and developing energy materials, but their thorough examination and characterization. In addition to solar cell technology and the promising application of nanostructures like quantum dots, the author discusses the science and potential of nuclear fusion material hydrogen storage materials, BN nanomaterials, alternative fuel cells and SIC FET.

As humanity's collective consciousness evolves and expands, more of us are experiencing phenomena—voices no one else hears, visions no one else sees, intense intuitive feelings that presage the future or enable us to telepathically connect to loved ones. Some of us communicate with the dead, see interdimensional beings, claim to have

And some of us experience synchronicities that defy the odds. Are we outliers? Or are we, as a growing number of psychiatrists, scientists, and researchers now recognize, tapping into a matrix of reality far more vast and complex than what science currently recognizes?

"The Future of Astrology" is a selection of essays written by some of the foremost astrologers in the world today. Topics explored include astrology and scientific research, psychology, biology, and economics; science versus astrology; the professionalism of practitioners; the politics of astrology; the insights offered by esoteric astrology; astrology as a science; the role of counseling; and astrological predictions about the future of our world.

This book uses scientific theory to explain some of the extrascientific phenomena such as UFOs and poltergeists.
