***In Plain Sight* explores how the poetry of nineteenth-century American women that was once so visible within American culture could have, with the exception of that by Emily Dickinson, so thoroughly disappeared from literary history. By investigating erasure not merely as something that was done to these women but as the result of the conventions that once made the circulation of their poetry possible in the first place, this volume offers the first book-length analysis of the conventions of nineteenth-century American women's poetry. While each of the chapters focuses on a specific convention, taken together they tell the complicated story of nineteenth-century American women's poetry, tracing the spaces within literary culture where it lived and thrived, the spaces from which it was always in the process of vanishing. By reclaiming these conventions as a constitutive part of nineteenth-century American women's poetry, this book asks readers to take seriously the work these women produced and the role their work might play in remapping American literary history.**

This essential and aspirational text is aimed at all beginning teachers whatever your training route, age phase and setting. It explicitly adopts and builds on a new metaphor for teachers' professional learning as interplay between the body of public knowledge and the practical wisdom of teachers within a particular school setting. It also accepts that 'telling' you how to teach is ineffective; you need to 'become a teacher' because it involves identity and practice. Inquiry-based critically reflective learning with a clear focus on the learning of pupils is proposed as the core strategy by which you can build your knowledge and skills to become an outstanding teacher. Core topics, including planning, inclusion, teaching, assessment and professional development, are tackled in an accessible and refreshing way, using key research informed evidence. The focus is relentlessly on 'learning' rather than performance, in order to support you becoming an excellent professional teacher, rather than a competent technician, who makes a difference to learners, colleagues, schools and policy. Think of this book as a temporary or additional mentor, challenging you with different ways of thinking about learning and providing strategies to guide your professional learning. "It takes 10 years or more to begin to be a brain surgeon, but sometimes we get 1-3 years at most before we are allowed to work with children's brains as teachers. So we need inspirational teachers and this is the focus of this compact, powerful and insightful book. It is wonderfully designed around five of the most critical dilemmas in our classrooms: belief vs. ability; autonomy vs. compliance; abstract vs. concrete; feedback vs. praise; and

collaboration vs. competition. The power of the book is that it illustrates the new move to focus on learning power – and such a focus permits every student to become smarter through effort and deep practice as they struggle with the high-challenge learning activities – in the presence of inspirational, impactful and passionate teachers. The perfect book for those who want to make most of their opportunity to enhance students’ brain power.” John Hattie, Director, Melbourne Education Research Institute

When is leadership not relational? When is education not relational? When is life not relational? Relationships always matter to our living, educating and leading. Relational Leadership in Education considers this ‘ Relational Leadership ’ within the context of education, critiquing the current ideological ‘ context ’ and contemporary understandings of its influence. Employing a phenomenological approach, this book explores the relational nature of education, Relational Leadership, and the organizational culture to provide a more sophisticated exploration of practice-based wisdom. It offers an extensive range of activities for further thinking on the experiential nature of Relational Leadership, grouped

around a number of themes: Relational Leadership and sensibilities; organizational culture; professional development; curriculum, pedagogy and assessment; and the reconstruction of a postgraduate Educational Leadership and Management programme for experienced, emergent and aspiring leaders. ‘ Relational Leadership ’ is not about describing yet another style of leadership but rather about a relational way of being in leadership that utilizes refined relational sensibilities. ‘ Relational Leadership ’ is also a reminder of what is critical in a leader ’ s practice — leadership is always relational, and relationships are the essence of leadership.
