Computer Sourcebook is the perfect resource for anyone who wants maximum efficiency from their time and computer. It covers hardware, software and support; training and seminars; online and print publications; and much more.

Authoritative text deals with interstate and international private litigation, business planning, estate planning, and administration. The text introduces the development and current state of approaches to choice of law. Provides the basics for determining applicable law. Reviews jurisdiction, its limitations, and its special problems. Discusses marriage, property, dissolution, and adoption. Also covers torts, contracts, succession, trusts, probate, corporations, and bankruptcy.

In his remarkable, path-breaking new book, Peter Sparkes takes stock of the development of a distinctive body of European land law, taking as his starting point the idea that methods of land-holding permitted by a legal system both shape and reflect the attitudes of the land owners and society in general. However it quickly becomes very difficult to test that idea when the society in question is governed by an internal market composed of 30 countries (the EU-27, including Bulgaria and Romania, and the EEA-3), whose property systems differ so markedly and which reflect such widely differing cultures. Yet the internal market has already effected a gradual equalisation and standardisation across Europe as foreign capital spreads to create equality of yield. "We all become better off by joining a larger trading block but the social consequences will be profound: Brits will need to emigrate to the continent to afford a home, Bulgarians will need to make way for them along the Black Sea coast, and title deeds will be reshuffled all over Europe on a giant Monopoly board" writes the author in his preface, before embarking on a dispassionate examination of the beginning of that process of profound change. The opening chapters are devoted to an explanation of how the internal market has created a substantive European land law. Chapter 3 examines the rise of a distinctive European land law, and the development of conflicts principles applying to recovery of land. Chapters 5 to 9 on the marketing and sale of land focus upon Community competence on consumer protection. The decision to treat land as a product like any other in the Unfair Commercial Practices Directive will have wide ranging and far reaching implications and, apart from marketing of land and of timeshares, other chapters deal with conveyancing, contracting and the emerging market in mortgage credit. The book concludes with a miscellany of conflicts rules which are gradually coalescing and form the elements from which a substantive European land law can be forged. A number of topics which it is not possible to cover in detail (VAT, other taxes, environmental controls and agriculture) are touched on briefly, and the same is true of international aspects of trusts and succession.

A variety of disciplines and professions have embraced geospatial technologies for collecting, storing, manipulating, analyzing and displaying spatial data to investigate crime, prosecute and convict offenders, exonerate suspects and submit evidence in civil lawsuits. The applications, acceptability and relevance and procedural legality of each geospatial technologies vary. The purpose of this book is to explain the nature of geospatial technologies, demonstrate a variety of geospatial applications used to investigate and litigate civil and criminal activities and to provide a reference of current acceptability of geospatial technology in the production of evidence. This book is an introductory overview designed to appeal to researchers and practitioners across disciplinary boundaries. The authors of this book are researchers and practitioners across disciplines and professions, experts in the field.

The Monetary Authority of Singapore, Asian Bureau of Finance and Economic Research, University of Chicago Booth Business School, and National University of Singapore Business School have organised the Asian Monetary Policy Forum (AMPF) annually since 2014. The Forum brings together eminent academics, policymakers and private sector economists to deliberate pressing monetary policy issues particularly relevant for Asian countries.This volume collects the inaugural speech and commissioned papers from the past Forums from 2014 to 2020. The chapters cover a range of topics that have assumed importance in the global monetary and financial system over the past twenty years. These include the efficacy of traditional monetary policy frameworks amid synchronised global financial flows, the challenges presented by the US dollar dominance, and the optimality of central banks' use of a broader set of policy instruments within an integrated policy framework. Policymakers, practitioners, students and academicians will be able to draw from this volume useful insights to understand these complex policy challenges.

Reflections on Citizenship, Violence, and the 2007 General Elections in Kenya

This report from the Business, Innovation and Skills Committee concludes that while the Government has proposed a number of interventions which have the potential to help promote economic growth, it does not add up to a comprehensive growth strategy. The report highlights the fact that in the absence of clear performance measurements the Department for Business, Innovation and Skills' strategy runs the risk that economic success could mask failures in policy while economic hardship could overshadow excellent strategies or interventions. The report argues that different sectors of the economy have different requirements when it comes to government support and that the Department will have to develop a strong awareness of the needs of individual sectors and have the flexibility to react to them if we are to build capability across all sectors of the economy. While the Government's growth strategy appears to move in this direction, evidence from three sectors has shown that much work needs to be done. The banks' role in providing finance to business is crucial to the success of the economy. The report believes that the agreement struck between Government and the banks (Project Merlin) is a step in the right direction but the agreement must be shown to deliver real benefits to industry. If the economic recovery is to be sustained then both Government and banks need to move quickly from rhetoric to meaningful support to the private sector.

BBSES range from small hobbyist systems with only a few files or message areas to large commercially run boards with numerous access lines and features. Arrangement of this directory is by state; a master list and a topic index help provide access to 10,000 bulletin boards. Entries include contact and personnel details and a brief description. Anno

The Alcoholic Relationship Survival Guide has been helping people resolve alcoholic relationships since 2001, and is no ordinary alcoholic relationship book. It is a powerful and comprehensive resource that explains the dynamics of an alcoholic relationship from the perspective by people who have been though it successfully. It explains the why's and how's of your situation in an easy-to-understand-but-no-holds-barred style that will encourage you, comfort you, anger you, and then help you to resolve your difficult situation in the most healthy and beneficial way possible. The Alcoholic Relationship Survival Guide will teach you healthy and effective ways to respond to alcoholic dysfunction and verbal abuse. It will show you pitfalls to avoid and solutions that work, including how to set healthy boundaries and reinvent yourself into a "New You." After reading this book you will not only understand your situation much more clearly, but you will also know what steps to take next. This book applies to any form of substance abuse that is causing relationship problems.

There is no singular interpretation over the forces that almost brought Kenya to a standstill around the 2007 general elections. The 'truth' about what actually happened will be found in the in-between spaces of dialogue and voicing. Somewhere amidst these at times contradictory and at times reaffirming voices can be found glimpses of what the pursuit of political power can do to a people, especially in a State where accountability to citizens is of minimal value. The essays in Defining Moments capture some of the transformative moments during the crisis that rocked Kenya in 2007/2008 and in its resolution. These reflections by journalists, lawyers, political scientists and cultural workers provide additional perspectives to the relationship between elections, citizenship and violence. This book follows in the footsteps of Healing the Wound: Personal Narratives about the 2007

Post Election Violence in Kenya and Re-membering Kenya Vol.1. Identity, Cultural and Freedom. We revisit some of the hotspots, the mediation process and ways of ending impunity. This is part of on-going work at Twaweza Communications to provide space so that multiple voices can be heard as we seek to build a peaceful and just society. In the process we hope to show that violent conflict can be avoided through structural and behavioural engineering: fix governance, ensure accountability, give credibility to institutions, anchor justice and rule of law.

IPCC assessment of the scientific, technical, environmental, economic, and social aspects of the mitigation of climate change.

The Book The behaviour of helicopters and tiltrotor aircraft is so complex that understanding the physical mechanisms at work in trim, stability and response, and thus the prediction of Flying Qualities, requires a framework of analytical and numerical modelling and simulation. Good Flying Qualities are vital for ensuring that mission performance is achievable with safety and, in the first and second editions of Helicopter Flight Dynamics, a comprehensive treatment of design criteria was presented, relating to both normal and degraded Flying Qualities. Fully embracing the consequences of Degraded Flying Qualities during the design phase will contribute positively to safety. In this third edition, two new Chapters are included. Chapter 9 takes the reader on a journey from the origins of the story of Flying Qualities, tracing key contributions to the developing maturity and to the current position. Chapter 10 provides a comprehensive treatment of the Flight Dynamics of tiltrotor aircraft; informed by research activities and the limited data on operational aircraft. Many of the unique behavioural characteristics of tiltrotors are revealed for the first time in this book. The accurate prediction and assessment of Flying Qualities draws on the modelling and simulation discipline on the one hand and testing practice on the other. Checking predictions in flight requires clearly defined mission tasks, derived from realistic performance requirements. High fidelity simulations also form the basis for the design of stability and control augmentation systems, essential for conferring Level 1 Flying Qualities. The integrated description of flight dynamic modelling, simulation and flying qualities of rotorcraft forms the subject of this book, which will be of interest to engineers practising and honing their skills in research laboratories, academia and manufacturing industries, test pilots and flight test engineers, and as a reference for graduate and postgraduate students in aerospace engineering.

This valuable book provides a concise, yet thorough analysis of the major legal issues arising in civil actions litigated under the Racketeer Influenced and Corrupt Organizations Act (RICO). Well organized and indexed, Civil RICO guides you through the complex statute and morass of related case law and helps you quickly locate the issues pertinent to your case. This new edition identifies all major

emerging issues in civil RICO litigation and advises you on current developments.

Explores the historical evolution of subcontracting in Japan and analyzes its current practice, outlining a new mode of contractual relations based on the principles of problem-solving collaborative manufacturing. This system strives towards continuous improvements in quality and cost reduction.

Recent decades have seen a dramatic shift away from social forms of gambling played around roulette wheels and card tables to solitary gambling at electronic terminals. Slot machines, revamped by ever more compelling digital and video technology, have unseated traditional casino games as the gambling industry's revenue mainstay. Addiction by Design takes readers into the intriguing world of machine gambling, an increasingly popular and absorbing form of play that blurs the line between human and machine, compulsion and control, risk and reward. Drawing on fifteen years of field research in Las Vegas, anthropologist Natasha Dow Schüll shows how the mechanical rhythm of electronic gambling pulls players into a trancelike state they call the "machine zone," in which daily worries, social demands, and even bodily awareness fade away. Once in the zone, gambling addicts play not to win but simply to keep playing, for as long as possible—even at the cost of physical and economic exhaustion. In continuous machine play, gamblers seek to lose themselves while the gambling industry seeks profit. Schüll describes the strategic calculations behind game algorithms and machine ergonomics, casino architecture and "ambience management," player tracking and cash access systems—all designed to meet the market's desire for maximum "time on device." Her account moves from casino floors into gamblers' everyday lives, from gambling industry conventions and Gamblers Anonymous meetings to regulatory debates over whether addiction to gambling machines stems from the consumer, the product, or the interplay between the two. Addiction by Design is a compelling inquiry into the intensifying traffic between people and machines of chance, offering clues to some of the broader anxieties and predicaments of contemporary life. At stake in Schüll's account of the intensifying traffic between people and machines of chance is a blurring of the line between design and experience, profit and loss, control and compulsion.

The Academy is an institution for the study and teaching of Public and Private International Law and related subjects. Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law. The courses deal with the theoretical and practical aspects of the subject, including legislation and case law. All courses at the Academy are, in principle, published in the language in which they were delivered in the "Collected Courses of the" "Hague Academy of International Law," To access the abstract texts for this volume please click here

The Wiley Handbook of Science and Technology for Homeland Security is an essential and timely collection of resources designed to support the effective communication of homeland security research across all disciplines and institutional boundaries. Truly a unique work this 4 volume set focuses on the science behind safety, security, and recovery from both man-made and natural disasters has a broad scope and international focus. The Handbook: Educates researchers in the critical needs of the homeland security and intelligence communities and the potential contributions of their own disciplines Emphasizes the role of fundamental science in creating novel technological solutions Details the international dimensions of homeland security and counterterrorism research Provides guidance on technology diffusion from the laboratory to the field Supports cross-disciplinary dialogue in this field between operational, R&D and consumer communities
